Recovery of People with Mental Illness Abraham Rudnick, 2012-08-30 It is only in the past 20 years that the concept of recovery from mental health has been more widely considered and researched Before then it was generally considered that stability was the best that anyone suffering from a mental disorder could hope for But now it is recognised that throughout their mental illness many patients develop new beliefs feelings values attitudes and ways of dealing with their disorder The notion of recovery from mental illness is thus rapidly being accepted and is inserting more hope into mainstream psychiatry and other parts of the mental health care system around the world Yet in spite of conceptual and other challenges that this notion raises including a variety of interpretations there is scarcely any systematic philosophical discussion of it This book is unique in addressing philosophical issues including conceptual challenges and opportunities raised by the notion of recovery of people with mental illness Such recovery particularly in relation to serious mental illness such as schizophrenia is often not about cure and can mean different things to different people For example it can mean symptom alleviation ability to work or the striving toward mental well being with or without symptoms The book addresses these different meanings and their philosophical grounds bringing to the fore perspectives of people with mental illness and their families as well as perspectives of philosophers mental health care providers and researchers among others The important new work will contribute to further research reflective practice and policy making in relation to the recovery of people with mental illness It is essential reading for philosophers of health psychiatrists and other mental care providers as well as policy makers

issue of Literature and Medicine focuses on difference and identity in the context of disease and disability The articles collected here explore the complex ways in which notions of disease disability and difference are related and in which bodies marked by gender race disability sexuality and ethnic identities experience disease in specific ways The essays take a humanities based approach to the subject and emphasize an awareness and sensitivity to difference through forms of symbolic representation such as metaphor and narrative This volume provides a heuristic lens through which relationships between individual expressions of identity and communal experiences of difference can be considered Each article speaks to the process whereby individual stories and strategies shape and are in turn shaped by the institutions they seek to transform Literature and Medicine is devoted to exploring interfaces between literary and medical knowledge and understanding The journal showcases the creative and critical work of renowned physician writers leading literary scholars and medical humanists
