never had it so good With global decolonization UK trade turned more to the European Economic Community EEC and less to the Commonwealth countries with the UK joining the EEC and its successor the European Union from 1973 until 2020 All four countries saw population growth both from the birth rate and substantial net inward migration But as this volume argues developments were not uncomplicated The need for more housing for example was partly met by tower blocks but some of these deteriorated after relatively short lives and were demolished while others became sink estates Urban change also saw the decline of shopping centres and small independent shops In addition to examining this economic and social change Chris Wrigley focuses on popular culture from the growth in TV to developments in music and art as well as the continued influences of declining entertainments like the music hall The volume combines a focus on post imperial features with a recognition of the long shadow cast by the Second World War The United Kingdom Since 1945 is distinctive in its long timespan and its breadth of coverage and is the perfect introduction for all readers interested in the complex contemporary history of this diverse nation

Multinational Business Service Firms Joanne Roberts, 2018-10-26 First published in 1998 this influential volume entered the debate on Foreign Direct Investment in the UK and focuses on the role of Multinational Enterprises MNEs in the service rather than manufacturing and primary sectors While the significance of the service industry had been recognised exceeding 60% of total GDP in some countries at the time of original publication the role of FDI has not Joanne Roberts thus contributed to a woefully under researched field covering areas including international trade the organisational theory of the firm and the UK business sector

Debating Organization Robert Westwood, Stewart Clegg, 2009-02-04 This volume introduces readers to the central debates of organization studies through a series of point and counterpoint debates by major figures in the field Introduces readers to the central tensions and debates of organization studies Celebrates the productive heterogeneity of the field by placing competing perspectives side by side Includes contributions from major figures in the field Structured in an innovative point and counterpoint format
