## Up The Math Ladder:

**Up the Math Ladder** Lynn Molyneux, 1984-06-01 *Math for the Very Young* Lydia Polonsky, Dorothy Freedman, Susan Leshner, Kate Morrison, 1995-04-03 Four experienced teachers who have written math curricular materials for the University of Chicago School Mathematics Project present a comprehensive collection of innovative and fun activities easy enough for even the most math phobic parents Covers all math concepts appropriate for children ages 3 7 including measurement counting telling time and temperature comparisons arrays shapes and patterns Organized by type of activity such as cooking taking a trip playing games and making crafts

**Math Mutation Classics** Erik Seligman, 2016-04-22 Use math in unique ways to analyze things you observe in life and use proof to attain the unexpected There is quite a wide diversity of topics here and so all age levels and ability levels will enjoy the discussions You ll see how the author s unique viewpoint puts a mathematical spin on everything from politicians to hippos Along the way you will enjoy the different point of view and hopefully it will open you up to a slightly more out of the box way of thinking Did you know that sometimes  $2 + 2 = 5$  That wheels don t always have to be round That you can mathematically prove there is a hippopotamus in your basement Or how to spot four dimensional beings as they pass through your kitchen If not then you need to read this book Math Mutation Classics is a collection of Erik Seligman s blog articles from Math Mutation at MathMutation.com Erik has been creating podcasts and converting them in his blog for many years Now he has collected what he believes to be the most interesting among them and has edited and organized them into a book that is often thought provoking challenging and fun What You Will Learn View the world and problems in different ways through math Apply mathematics to things you thought unimaginable Abstract things that are not taught in school Who this Book is For Teenagers college level students and adults who can gain from the many different ways of looking at problems and feed their interest in mathematics

Mathematical Circle Diaries, Year 1 Anna Burago, 2013 Early middle school is a great time for children to start their mathematical circle education This time is a period of curiosity and openness to learning The thinking habits and study skills acquired by children at this age stay with them for a lifetime Mathematical circles with their question driven approach and emphasis on creative problem solving have been rapidly gaining popularity in the United States The circles expose children to the type of mathematics that stimulates development of logical thinking creativity analytical abilities and mathematical reasoning These skills while scarcely touched upon at school are in high demand in the modern world This book contains everything that is needed to run a successful mathematical circle for a full year The materials distributed among 29 weekly lessons include detailed lectures and discussions sets of problems with solutions and contests and games In addition the book shares some of the know how of running a mathematical circle The curriculum which is based on the rich and long standing Russian math circle tradition has been modified and adapted for teaching in the United States For the past decade the author has been actively involved in teaching a number of mathematical circles in the Seattle area This book is based on her experience and

on the compilation of materials from these circles The material is intended for students in grades 5 to 7 It can be used by teachers and parents with various levels of expertise who are interested in teaching mathematics with the emphasis on critical thinking Also this book will be of interest to mathematically motivated children In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession

Realms Of Knowledge Leslie Santee Siskin,2014-01-21 This study examines academic departments as a context for teaching in the secondary school It explores why teachers find departments to be crucial to the high school setting In all three schools studied and in all four subjects English Maths Science and Social Science teachers even those who felt isolated in their classrooms located their sense of professional identity practice and community in their departments Departments are seen as boundaries for dividing the school centres of social interaction a micro political decision making forum as a subject knowledge category Those concerns are important at this time as various attacks are being made on school structures and subject and administration fragmentation in these cases subjects are seen as obstacles to change To subject groups they are viewed as potential vehicles to carry and confirm the message
