The greatest drivers of change over the last 50 years

On land and in freshwater:

- Agricultural management
- Climate change

At sea and around our coasts:

- Unsustainable fishing
- Climate change
- Marine development

These drivers continue from centuries of habitat loss, development and persecution.

The UK is one of the most nature depleted countries on Earth.

The UK's ambitious targets to address nature loss:

- Improve species status
- Increase nature-friendly farming, fisheries and forestry
- Expand and manage protected areas
- Increase ecosystem restoration
- Co-ordinate our response to the nature and climate crises

Conservation actions deliver results for nature

In Lyme Bay Marine Protected Area, the number of species has increased since trawling was banned in 2008

Natterjack Toad populations have stabilised or expanded at sites where conservation management has been well-resourced

Large-scale restoration projects, such as Cairngorms Connect, are helping to benefit many woodland-dependent species
