Statistical Concepts - A First Course Debbie L. Hahs-Vaughn, 2020-01-20

Statistical Concepts A First Course presents the first 10 chapters from An Introduction to Statistical Concepts Fourth Edition Designed for first and lower level statistics courses this book communicates a conceptual intuitive understanding of statistics that does not assume extensive or recent training in mathematics and only requires a rudimentary knowledge of algebra Covering the most basic statistical concepts this book is designed to help readers really understand statistical concepts in what situations they can be applied and how to apply them to data Specifically the text covers basic descriptive statistics including ways of representing data graphically statistical measures that describe a set of data the normal distribution and other types of standard scores and an introduction to probability and sampling The remainder of the text covers various inferential tests including those involving tests of means e g t tests proportions variances and correlations Providing accessible and comprehensive coverage of topics suitable for an undergraduate or graduate course in statistics this book is an invaluable resource for students undertaking an introductory course in statistics in any number of social science and behavioral science disciplines

A First Course in Statistics James T. McClave, Terry Sincich, 2002-06 For courses in Statistics This introduction to statistics presents balanced coverage of both the theory and application of statistics and at the same time helps students develop and enhance their critical thinking skills It shows students how to analyze data that appear in situations in the world around them and features an abundance of examples and exercises nearly all based on current real world applications pulled from journals magazines news articles and commerce

Business Statistics David M. Levine, Kathryn A. Szabat, David Stephan, 2020 This title is a Pearson Global Edition The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States For one semester business statistics courses This package includes MyLab A focus on using statistical methods to analyze and interpret results to make data informed business decisions Statistics is essential for all business majors and Business Statistics A First Course helps students see the role statistics will play in their own careers by providing examples drawn from all functional areas of business Guided by the principles set forth by major statistical and business science associations ASA and DSI plus the authors diverse experiences the 8th Edition Global Edition continues to innovate and improve the way this course is taught to all students With new examples case scenarios and problems the text continues its tradition of focusing on the interpretation of results evaluation of assumptions and discussion of next steps that lead to data informed decision making The authors feel that this approach rather than a focus on manual calculations better serves students in their future careers This brief offering created to fit the needs of a one semester course is part of the established Berenson
