Communicating Science and Engineering Data in the Information Age National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Communicating National Science Foundation Science and Engineering Information to Data Users, 2012-03-07 The National Center for Science and Engineering Statistics NCSES of the National Science Foundation NSF communicates its science and engineering S E information to data users in a very fluid environment that is undergoing modernization at a pace at which data producer dissemination practices protocols and technologies on one hand and user demands and capabilities on the other are changing faster than the agency has been able to accommodate NCSES asked the Committee on National Statistics and the Computer Science and Telecommunications Board of the National Research Council to form a panel to review the NCSES communication and dissemination program that is concerned with the collection and distribution of information on science and engineering and to recommend future directions for the program *Communicating Science and Engineering Data in the Information Age* includes recommendations to improve NCSES s dissemination program and improve data user engagement This report includes recommendations such as NCSES s transition to a dissemination framework that emphasizes database management rather than data presentation and that NCSES analyze the results of its initial online consumer survey and refine it over time The implementation of the report s recommendations should be undertaken within an overall framework that accords priority to the basic quality of the data and the fundamentals of dissemination then to significant enhancements that are achievable in the short term while laying the groundwork for other long term improvements

Statistics for Engineers Jim Morrison, 2009-07-20 This practical text is an essential source of information for those wanting to know how to deal with the variability that exists in every engineering situation Using typical engineering data it presents the basic statistical methods that are relevant in simple numerical terms In addition statistical terminology is translated into basic English In the past a lack of communication between engineers and statisticians coupled with poor practical skills in quality management and statistical engineering was damaging to products and to the economy The disastrous consequence of setting tight tolerances without regard to the statistical aspect of process data is demonstrated This book offers a solution bridging the gap between statistical science and engineering technology to ensure that the engineers of today are better equipped to serve the manufacturing industry Inside you will find coverage on the nature of

variability describing the use of formulae to pin down sources of variation engineering design research and development demonstrating the methods that help prevent costly mistakes in the early stages of a new product production discussing the use of control charts and management and training including directing and controlling the quality function The Engineering section of the index identifies the role of engineering technology in the service of industrial quality management The Statistics section identifies points in the text where statistical terminology is used in an explanatory context Engineers working on the design and manufacturing of new products find this book invaluable as it develops a statistical method by which they can anticipate and resolve quality problems before launching into production This book appeals to students in all areas of engineering and also managers concerned with the quality of manufactured products Academic engineers can use this text to teach their students basic practical skills in quality management and statistical engineering without getting involved in the complex mathematical theory of probability on which statistical science is dependent
