Stripped Assets:

Political Economy of Transition and Development Nauro F. Campos, Jan Fidrmuc, 2003-11-30 *Political Economy of Transition and Development* collects the proceedings of an international conference that brought the leading thinkers in this field to the Center for European Integration Studies of the University of Bonn in May 2002. The contributions analyze the various interactions between institutions, policy choices, economic developments, and political outcomes in transition and developing countries. The first five chapters give a relatively broad assessment of the various reform paths and outcomes in the transition and developing countries. The remaining eight chapters proceed to analyze important aspects of transition such as voting behavior, political regime choice, corruption, social capital, growth, and inequality, and EU enlargement. The resulting volume thus combines a bird's-eye perspective with a relatively narrow focus on selected key issues pertaining to the ongoing transition process in Central and Eastern Europe.
