Structure Of Personal Characteristics

K. A. Bender, R. F. Elliott

Structure Of Personal Characteristics:

Ebook: Theories of Personality Jess Feist, Gregory Feist, Tomi-Ann Roberts, 2014-10-16 The 8th edition of Theories of Personality follows in the tradition of the previous versions by centering on the premise that personality theories are a reflection of the unique cultural background, family experiences, personalities, and professional training of their originators. The book begins by acquainting students with the meaning of personality and providing them with a solid foundation for understanding the nature of theory as well as its crucial contributions to science. The chapters that follow present twenty-three major theories; coverage of each theory also encompasses a biographical sketch of each theorist, related research, and applications to real life. Changes in the 8th edition included a new chapter 8 on evolutionary personality theory focusing on the work of David Buss. The Related Research sections in each chapter have also been updated. *Decentralised Pay Setting* K. A. Bender, R. F. Elliott, 2018-12-13 This title was first published in 2003. In the early 1990s, Australia, Sweden, and the UK dismantled the old centralised pay setting systems which set the pay of civil servants and adopted decentralised pay systems. Consequently, these systems are now being considered by many other European countries as they look to reform their own systems. Bender and Elliott analyse the outcomes of these pioneering reforms in all three countries and, in doing so, provide the most detailed analysis of the pay of civil servants in these three countries to date. The authors further assess the effect that decentralisation had on the inequality of pay both within and between different departments, agencies, and ministries. They identify the differences in the rates of pay growth for the different grades of civil servants that lie behind the changes in pay inequality and assess whether decentralisation changed the way in which civil servants are paid. Emerging Issues and Methods in Personality Assessment John A. Schinka, Roger L. Greene, 2013-06-17 This book constitutes a collection of articles that were written for and recently published as special sections in three consecutive issues of the Journal of Personality Assessment. Part I provides lucid commentaries on the current status of and future issues regarding the Rorschach and MMPI-2 and other instruments including the Minnesota Multiphasic Personality Inventory, Adolescent MMPI-A, the Interpersonal Adjective Scales, IAS-R, the Inventory of Interpersonal Problems, Circumplex version, IIP-C, the revised NEO Personality Inventory, NEO-PI-R, and the third edition of the Millon Clinical Multiaxial Inventory, MCMI-III. The authors not only participated in the development of the instruments but continue to lead the research effort in their application in both clinical and research settings. Part II addresses several issues that have been recurring themes and often topics of debate in the research and professional literature. The contributors discuss the impact of the five factor model on personality assessment, the issue of deception in personality assessment, and various critical issues in the measurement of mood states. Other articles focus on the integration of the MMPI-2 and Rorschach and the process that clinicians should follow when applying scientific knowledge to clinical practice. Part III is primarily devoted to overviews of several statistical methods that are employed infrequently in personality assessment research but have great potential in contributing to the understanding of the complex

data sets often encountered in the measurement and study of personality These articles serve as both an introduction and a brief tutorial for personality researchers who are unfamiliar with the subject matter They are valuable references that will form the basis for evaluating the appropriate use of these methods in published research in their areas of interest

A Study of Some Personality Characteristics of Epileptics Edward Wiltcher Arluck,1941 *The Structure of Personal Characteristics* David Romney,John M. Bynner,1992-11-30 The purpose of this book is to show that the prevalent view of personal characteristics which has been influenced to a large extent by factor analysis may not be the soundest or the most useful Structural equation modeling entails a more comprehensive approach to modeling relationships between variables than factor analysis and enables one to test alternative models to the factor model in accounting for these relationships In this work this proposition is demonstrated by drawing on the research the authors have conducted in three important domains of personal characteristics abilities personality disorders and self attitudes The authors discoveries in these areas have far reaching and innovative implications not only for psychological and psychosocial theory but also for applied areas such as teaching psychotherapy and communication
