Structures For Semantics:

Structures for Semantics Fred Landman, 2012-12-06 Formalization plays an important role in semantics Doing semantics and following the literature requires considerable technical sophistication and acquaintance with quite advanced mathematical techniques and structures But semantics isn't mathematics These techniques and structures are tools that help us build semantic theories Our real aim is to understand semantic phenomena and we need the technique to make our understanding of these phenomena precise The problems in semantics are most often too hard and slippery to completely trust our informal understanding of them This should not be taken as an attack on informal reasoning in semantics On the contrary in my view very often the essential insight in a diagnosis of what is going on in a certain semantic phenomenon takes place at the informal level It is very easy however to be misled into thinking that a certain informal insight provides a satisfying analysis of a certain problem it will often turn out that there is a fundamental unclarity about what the informal insight actually is Formalization helps to sharpen those insights and put them to the test

Semantic Structures Ray S. Jackendoff, 1992-04-22 Semantic Structures is a large scale study of conceptual structure and its lexical and syntactic expression in English that builds on the system of Conceptual Semantics described in Ray Jackendoff's earlier books Semantics and Cognition and Consciousness and the Computational Mind Jackendoff summarizes the relevant arguments in his two previous books setting out the basic parameters for the formalization of meaning and comparing his mentalistic approach with Fodor's Language of Thought hypothesis He then takes up the Problem of Meaning extending the range of semantic fields encompassed by the Conceptual Semantics formalism and the Problem of Correspondence formalizing the relation between semantic and syntactic structure Both of these problems must be fully addressed in order to develop a general theory of language that is concerned with syntax and semantics and their points of connection Few books on lexical semantics present such a comprehensive analysis of such a wide range of phenomena from a unified perspective Besides discussing the conceptual structures of hundreds of words and constructions Jackendoff extends and deepens the theory to come to grips with such crucial issues as roles and marking arguments modifiers and adjuncts binding and control and the thematic linking hierarchy

Topic-Focus Articulation, Tripartite Structures, and Semantic Content Eva Hajicová,Barbara B.H. Partee,P. Sgall,2013-03-09 1 1

OBJECTIVES The main objective of this joint work is to bring together some ideas that have played central roles in two disparate theoretical traditions in order to contribute to a better understanding of the relationship between focus and the syntactic and semantic structure of sentences Within the Prague School tradition and the branch of its contemporary development represented by Hajicova and Sgall HS in the sequel topic focus articulation has long been a central object of study and it has long been a tenet of Prague school linguistics that topic focus structure has systematic relevance to meaning Within the formal semantics tradition represented by Partee BHP in the sequel focus has much more recently become an area of concerted investigation but a number of the semantic phenomena to which focus is relevant have been extensively investigated and given explicit compositional semantic analyses The emergence of tripartite structures see Chapter 2 in formal semantics and the partial similarities that can be readily observed between some aspects of tripartite structures and some aspects of Praguian topic focus articulation have led us to expect that a closer investigation of the similarities and differences in these different theoretical constructs would be a rewarding undertaking with mutual benefits for the further development of our respective theories and potential benefit for the study of semantic effects of focus in other theories as well
