David G. Myers, C. Nathan DeWall, 2015-01-12 In this version of Psychology Twelfth Edition David Myers and Nathan DeWall break down the new edition's 16 chapters into 53 modules assignable in any sequence and brief enough to be read in one sitting. It's a format favored by a wide range of students and instructors, one that's supported by substantial research showing that students working with shorter reading assignments develop a deeper understanding of the material. The new edition of Modules includes the same new features and content of Psychology Twelfth Edition, including hundreds of new citations and new infographics. And like Psychology Twelfth Edition, it is more than ever a fully integrated text/media learning package with the modular edition's LaunchPad, now featuring dozens of new Concept Practice activities.

Loose-leaf Version for Psychology David G. Myers, C. Nathan DeWall, 2015-01-20 David Myers' new partnership with coauthor C. Nathan DeWall matches two dedicated educators and scholars, each passionate about teaching psychological science through writing and interactive media. With this new edition of the #1 bestselling Psychology, Myers and DeWall take full advantage of what an integrated text/media learning combination can do. New features move students from reading the chapter to actively learning online. How Would You Know puts students in the role of scientific researcher and includes tutorials on key research design principles. Assess Your Strengths self-tests help students learn a little more about themselves and include tips about nurturing key strengths. These and other innovations rest on the same foundations that have always distinguished a new David Myers edition: exhaustive updating, hundreds of new citations, captivating writing, and the merging of rigorous science with a broad human perspective that engages both the mind and heart.

Discovering Psychology Don Hockenbury, Sandra E. Hockenbury, 2016-03-02 Sandra Hockenbury and new coauthor Susan Nolan's remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy. The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science and the process of science itself, and by presenting important research in a clear, not oversimplified way. Hockenbury and Nolan also take full advantage of online learning, creating activities in LaunchPad that have students thinking about psychology as scientists do. New coauthor Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society for Teaching Psychology. She regularly gives talks about incorporating scientific literacy into the introductory course and across the psychology curriculum.
