and affection in intimate relationships in humans showing that considering the biological roots of male dominance on women does not imply any justification Bonino makes the case that awareness about the biological roots of violence and about the cultural messages supporting them is necessary for developing different messages and educational practices promoting human capacity of personal affective relationship where partners empathically recognize themselves as equal human beings Relationships are examined in relation to a domination submission framework with the author emphasizing the role individuals can play in promoting non aggressive relationships By examining aggressive behaviour in relation to cultural social psychological and biological ideas the author seeks to clarify the cause of violence in relation to gendered roles This is fascinating reading for anyone interested in violence in relationships and suitable for students and academics in psychology and the social sciences
