Structure Of Tone

David Kirk

Structure Of Tone:

The Structure of Tone Zhiming Bao, 1999 Annotation This book argues a fresh theory about the structure of tone Bao investigates a wide range of tone sandhi data from various Chinese dialects and other Asian tone languages providing empirical support for his proposal that tone is a formal entity which consists of register and contour Bao establishes a clear typological distinction between register tone languages and contour tone languages whose contour tones have a more complex structure

Segmental Structure and Tone Wolfgang Kehrein, Björn Köhnlein, Paul Boersma, Marc Oostendorp, 2017-12-18 This volume seeks to reevaluate the nature of tone segment interactions in phonology The contributions address among other things the following basic questions what tone segment interactions exist and how can the facts be incorporated into phonological theory Are interactions between tones and vowel quality really universally absent What types of tone consonant interactions do we find across languages What is the relation between diachrony and synchrony in relevant processes The contributions discuss data from various types of languages where tonal information plays a lexically distinctive role from pure tone languages to so called tone accent systems where the occurrence of contrastive tonal melodies is restricted to stressed syllables The volume has an empirical emphasis on Franconian dialects in the Netherlands Belgium and Germany but also discusses languages as diverse as Slovenian Livonian Fuzhou Chinese and Xhosa

Japanese Tone Structure Janet Breckenridge Pierrehumbert, Mary E. Beckman, 1988 Japanese Tone Structure provides a thorough phonetically grounded description of accent and intonation in Tokyo Japanese and uses it to develop an explicit account of surface phonological representation The unusual amount of quantitative phonetic data analyzed and its testing in a detailed model make this an important new study for theoretical phonologists phoneticians and specialists in Japanese The authors broader purpose however is to develop a general theory of surface representation that can capture salient facts about prosodic structure in all languages and provide a suitable input to phonetic rules The theory integrates autosegmental principles into a metrical account of prosodic structures in an explicit formalism The work establishes phonology and phonetics as a productive area in cognitive science Janet B Pierrehumbert is a member of the technical staff in the Department of Artificial Intelligence Research at AT T Bell Laboratories Mary E Beckman is an Assistant Professor in the Department of Linguistics at Ohio State University Japanese Tone Structure is a Linguistic Inquiry Monograph
