

STRUCTURALISM (PSYCHOLOGY)

Structuralism is a school of thought in psychology that attempts to understand human consciousness by examining its underlying components.

EXPLANATION

This approach breaks down mental processes into their smallest possible components and analyzes them. Through this approach, it seeks to understand how these components combine and, together, end up forming complex psychological phenomena.

STRUCTURALISM VS FUNCTIONALISM

Functionalism

The study of how our minds adapt to external stimuli in order to help us survive and thrive in our environments

Structuralism

The study of how our minds make meaning through small step-by-step cognitive processes.

Structuralism And Structures:

Structuralism And Structures Charles E Rickart,1995-02-20 This book is devoted to an analysis of the way that structures must enter into a serious study of any subject and the term structuralism refers to the general method of approaching a subject from the viewpoint of structure A proper appreciation of this approach requires a deeper understanding of the concept of structure than is provided by the simple intuitive notion of structures that everyone possesses to some degree Therefore a large part of the discussion is devoted directly or indirectly to a study of the nature of structures themselves A formal definition of a structure plus some basic general properties and examples is given early in the discussion Also in order to clarify the general notions and to see how they are used the later chapters are devoted to an examination of how structures enter into some special fields including linguistics mental phenomena mathematics and its applications and biology especially in the theory of evolution Because the author is a mathematician certain mathematical ideas have influenced greatly the choice and approach to the material covered In general however the mathematical influence is not on a technical level and is often only implicit Even the chapter on mathematical structures is nontechnical and is about rather than on mathematics Only in the last chapter and earlier in three short sections does one find any of the expected formal mathematics In other words the great bulk of the material is accessible to someone without a mathematical background

Cataloging Policy and Support Office,2013 *American Folklore Studies* Simon J. Bronner,1986 *Structuralism* Hector Davidson, Structuralism is an intellectual movement that emerged in the early to mid 20th century primarily influenced by the works of linguists anthropologists and philosophers Its foundational premise is that human culture including language myths and social institutions can be understood through underlying structures that govern them These structures are not always immediately visible but influence how individuals and societies behave think and organize themselves At its core structuralism asserts that elements of human culture must be studied in relation to one another within a larger system For example language can only be fully understood when the relationships between words and their meanings are considered This perspective contrasts with earlier intellectual traditions that focused on individual elements seeking meaning through isolated concepts Instead structuralism emphasizes the interconnections and patterns that form the basis of human existence The intellectual origins of structuralism can be traced back to the work of Swiss linguist Ferdinand de Saussure In his work Saussure argued that language is a system of signs each of which acquires meaning not by its inherent qualities but through its relationship to other signs His concept of the signifier the word or symbol and the signified the concept or meaning set the stage for structuralist thought Saussure's approach highlighted the importance of studying language as a system of differences where meanings are produced not in isolation but in opposition to other meanings

Logique et analyse ,2005 *The Deuteronomist's Prophet* Lissa M Wray Beal,2007-09-20 This book explores by way of narrative analysis the story of Jehu's revolt in 2 Kings 9 and 10 and the tensions and ambiguities surrounding the evaluation of Jehu that it contains In the narrative the Deuteronomist writes in many voices the prophet's the Lord the narrator even Jehu himself The tension within the Jehu narrative arises in the interaction of the various voices and careful study of these narrative voices reveals two primary criteria for evaluating Jehu 1 faithful observance of correct Deuteronomistic worship that is true Yahwistic worship in the Jerusalem Temple and 2 faithful obedience to the prophetic word Each criterion is expressed in the narrative and as a means of finally resolving the ambiguity of the evaluative voices the narrative presents the criterion of worship in supersession over the criterion of the prophetic word The narrative analysis shows how the Jehu narrative connects linguistically thematically and analogically to the larger Deuteronomistic History and provides rubrics under which a Deuteronomistic theology of kingly legitimation can be examined The theology that arises from the Jehu narrative in respect of kingly legitimation traced through the criteria of proper worship and the prophetic word at times adds unique emphases to the theology of kingly legitimation presented in the history At other times it stands seamlessly with the

theology of the larger history At all times the theology of worship and word shows the Jehu narrative ultimately cannot be read successfully or fully in isolation from the surrounding text and the theology presented there

Sartre and Psychoanalysis Betty Cannon, 1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre s work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud s psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud s work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self s ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy
