**Studies in Structure and Style (based on Seven Modern English Essays).** William Tenney Brewster, 1909 The Oxford Handbook of Event Structure Robert Truswell, 2019-03-21 This handbook deals with research into the nature of events and how we use language to describe events The study of event structure over the past 60 years has been one of the most successful areas of lexical semantics uniting insights from morphology and syntax lexical and compositional semantics cognitive science and artificial intelligence to develop insightful theories of events and event descriptions This volume provides accessible introductions to major topics and ongoing debates in event structure research exploring what events are how we perceive them how we reason with them and the role they play in the organization of grammar and discourse The chapters are divided into four parts the first covers metaphysical issues related to events the second is concerned with the relationship between event structure and grammar the third is a series of crosslinguistic case studies and the fourth deals with links to cognitive science and artificial intelligence more broadly The book is strongly interdisciplinary in nature with insights from linguistics philosophy psychology cognitive science and computer science and will appeal to a wide range of researchers and students from advanced undergraduate level upwards Structuring, Financing and Representing the Small Business, 1998 **The Structure and Growth of the Scales of Fishes in Relation to the Interpretation of Their Life-history** Carl Leavitt Hubbs, Charles William Creaser, Donald Joyce Borrer, Friedrich Ris, Josselyn Van Tyne, 1926 Journal of Philosophical Studies, 1927 **Dramatization in the Church School** Elizabeth Erwin (Miller) Lobingier, Elizabeth Miller Lobingier, 1923 **The Concept of Nature** Alfred North Whitehead, 1920 The Tarner Lectures delivered in Trinity College November 1919 **Event Structure** Jan Voorst, 1988-01-01 This study establishes a relation between the semantics of the subject and the direct object NP and aspect The notion of event is central Events have a beginning and an end This means in temporal terms that events have a point in time at which they begin and a point in time at which they end However events are not defined in temporal terms but in spatial terms This means that they are defined in terms of the entity that can be used to identify their beginning and the entity that can be used to identify their end These two entities are denoted by the subject and the direct object NP respectively The name of the event is provided by the verb It is these three notions that make up Event Structure the entity denoting the beginning i e the object of origin the entity denoting the end i e the object of termination and the event itself The three primitives are independently motivated in the domain of tense interpretations of sentences Their presence or absence affects these interpretations in a systematic way
