Syntax Of Words:

The Syntax of Words Elisabeth O. Selkirk, 1982-01-01 This monograph examines complex words compounds and those involving derivational and inflectional affixation from a syntactic standpoint that encompasses both the structure of words and the system of rules for generating that structure The author contends that the syntax of words and the more familiar syntax involving relations among words must be defined by two discrete sets of principles in the grammar but nevertheless that word structure has the same general formal properties as the larger syntactic structure and is generated by the same sort of rule system This investigation of word structure and rule systems is based for the most part on the word syntax of English and related languages One of its major conclusions is that English word structure can be properly characterized solely in terms of a context free grammar Selkirk points out that the Semitic languages for example must be characterized in terms of a more elaborate schema The first chapter presents a general theory of word structure and discusses a context free grammar for words X theory in word structure and word structure rules Chapter Two is concerned with compounding and probes the structure and headedness of compounds verbal compounds and the category type of English compounds The final chapter on affixation investigates the nature of affixes inflectional affixation and English derivational morphology Elisabeth O Selkirk has been associated with the Center for Cognitive Science at MIT and has recently been appointed Associate Professor of Linguistics at the University of Massachusetts Amherst Her book is the seventh in the Linguistic Inquiry Monograph series

Boundaries of Morphology and Syntax Lunella Mereu, 1999-06-15 The volume collects a selection of papers presented at a European Colloquium held at the Universit degli Studi di Roma Tre in October 1997 It focuses on phenomena at the boundary between morphology and syntax and provides analyses for data from the fields of both inflectional and derivational morphology and word order Morpho syntactic phenomena are analysed cross linguistically and cross theoretically as typologically different languages European Afro Asiatic American and Austronesian ones are dealt with and compared according to a variety of approaches from minimalism and lexical functional grammar to grammaticalization theory taking into account both synchronic variation and diachronic change The volume is divided into three sections I Morphological phenomena and their boundaries II Morpho syntax and pragmatics and III Morpho syntax and semantics as the interaction with the higher components of the grammar is seen as contributing to explaining variation in morpho syntactic behaviour
