White,NAVAL RESEARCH LAB WASHINGTON D C.,1963 Resistance capacitance networks provide filter ing insertion loss
variation with frequency For prescribed voltage transfer functions containing complex zeros and negative real poles known
synthesis procedures lead to RC networks exhibiting an undesirable frequency independent loss A new network synthesis
procedure is set forth and applied to obtain a four 7 element RC networks exhibiting damped complex zeros and b a 6
element RC network with undamped complex zeros of transmission When these new networks are applicable the prescribed
transfer function is realized exactly including the unity multi plicative constant In addition these networks have fewer
elements than previous realizations Author *Synthesis of Active RC Networks* Sanjit Kumar Mitra,1962 *Synthesis of*
Some Distributed RC Networks Cassius A. Hesselberth,1963 A certainibuted RC structure can be used to obtain rational
open circuit transfer impedances In addition one of the driving point impedances turns out to be rational Hence one of the
open circuit voltage transfer functions is also rational Furthermore by considering various subcircuits and distributions of
resistance and capacitance it is possible to realize other ra tional open circuit voltage transfer functions and rational short
circuit transfer admittances Connecting these networks in series extends the class of functions realizable with such struc
tures Using a basic distributed RC network along with an external resistor and capacitor it is possible to obtain a null in the
open circuit voltage transfer function over a certain re stricted range of frequencies However the shape of the notch is shown
graphically to be a function of the null frequency A lossy dielec tric in the distributed network is found to shift this range of
frequencies upwards and alter the notch characteristics in much the same way as in the low pass filter Author *Transfer*
Matrix Synthesis Using Active RC Networks Dov Hazony,R. D. Joseph,1965 Necessary conditions are established for the
voltage transfer matrix of a transformerless grounded network composed of ideal resistors inductors capacitors RLC and
grounded unity gain amplifiers These conditions are also shown to be sufficient for realization as the voltage transfer matrix
of a transformerless grounded network containing RC and not more than one grounded unity gain amplifier per matrix row
Similar necessary and sufficient conditions are presented for transformerless grounded input nongrounded output networks
composed of these same passive and active elements The grounded input nongrounded output case requires not more than
two grounded unity gain amplifiers per matrix row for its synthesis In the two port nongrounded case a special procedure
makes it possible to realize the transfer function by the proper connection of two identical threeterminal networks Author

Synthesis of RC Networks by Normal Coordinate Transformations Walter Carlton Schwab, 1962 **Synthesis of Passive Networks** Ernst Adolph Guillemin, 1957 Synthesis of Active Distributed RC Networks Via the W Roy Dale Hensley, 1971 The material presented here provides a means for synthesis of networks containing uniformly distributed RC elements After transforming the desired transfer function into a function rational in $W e^{\sqrt{sRC}}$ state variable synthesis methods are applied to obtain a model containing elements with transfer functions of the form $1/W A$ circuit is then presented for the $1/W$ block along with error analysis and design procedures for use in construction of the model The elements of the synthesis procedures of Wyndrum and O Shea are presented for comparison Furthermore synthesis of functions rational in W and $\theta \sqrt{s}$ is discussed with circuits provided to realize the $1/\theta$ block Examples are presented to illustrate the use of the material in lumped distributed synthesis and in simulation of the solutions to partial differential equations of the parabolic class Abstract leaf ii Synthesis of Lumped Distributed RC Network Stanford University.
