Systems Of Nominal Classification

Lauren Gardner

Systems Of Nominal Classification:

Systems of Nominal Classification Gunter Senft, 2000-08-03 This book first published in 2000 addresses the fundamental linguistic question of how the perceived world is expressed through systems of nominal classification that are grammatically encoded in various languages A team of leading international scholars reviews the whole spectrum of nominal classification from gender systems through to numeral classifiers providing cutting edge theoretical interpretations and empirical case studies based on a wide range of languages The volume presents ideas about the problems of classification advances theory by proposing typological categories and clarifies the interface between anthropological and grammatical work Focusing on systems that have a conceptual semantic basis the contributors reflect and represent approaches in nominal classification research This invaluable reference work will appeal to linguists anthropologists and psychologists alike as well as specialists in languages as diverse as Australian Amazonian Mayan and Japanese *what do we really know about nominal classification systems?* , *Nominal Classification* Marcin Kilariski, 2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics Based on an analysis of over 200 genetically and typologically diverse languages the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon grammar and the organization of discourse As a result the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure the diverse functions of grammatical categories linguistic complexity agreement phenomena and the interplay between lexicon and grammar The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier supposedly prescientific accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity *Verb Classification in Australian Languages* William B. McGregor, 2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates *Non-canonical Gender Systems* Sebastian Fedden, Jenny Audring, Greville G. Corbett, 2018 This book explores the boundaries of the category of gender and their theoretical significance within the framework of Canonical Typology International experts analyse a variety of gender systems from a range of typologically diverse languages from across the world from South America to Melanesia and from Central Italy to Northern Australia *Systems of Norminal Classification: a Concluding Discussion* , *The Typology and Diachrony of Nominal Classification*

Matthias Benjamin Passer,2016 There are two ways for a language to classify its nouns either by means of classifiers which specify the semantics of the classified noun or by means of grammatical gender which groups all nouns of a language into formal classes This thesis investigates the common assumption that classifier systems may develop into grammatical gender systems Because this diachronic phenomenon has not yet been documented for any language the likeliness that such a development would occur is examined by means of a typological study of synchronic systems In analyzing the data this study adopts a new perspective on the development of nominal classification by separating how the means of formal expression develops from the development of those components that have to do with a system s semantic transparency This twofold account for the data from a variety sample of 40 languages shows that there is indeed a number of systems that lie at the intersection of classifiers and gender systems but that a direct shift from classifier to gender is not likely to occur The Languages and Linguistics of Mainland Southeast Asia Paul Sidwell,Mathias Jenny,2021-08-23 The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area The last half century has seen a great increase in work on language contact work in genetic theoretical and descriptive linguistics and since the 1990s especially documentation of endangered languages The book will provide an account of work in these areas focusing on the achievements of SEAsian linguistics as well as the challenges and unresolved issues and provide a survey of the relevant major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region

The Development of Gender as a Grammatical Category Janet Duke,2009 Anthropological Linguistics ,2005

Metadata and Semantics Research Emmanouel Garoufallou,Richard J. Hartley,Panorea Gaitanou,2015-09-03 This book constitutes the refereed proceedings of the 9th Metadata and Semantics Research Conference MTSR 2015 held in Manchester UK in September 2015 The 35 full papers and 3 short papers presented together with 2 poster papers were carefully reviewed and selected from 76 submissions The papers are organized in several sessions and tracks general track on ontology evolution engineering and frameworks semantic Web and metadata extraction modelling interoperability and exploratory search data analysis reuse and visualization track on digital libraries information retrieval linked and social data track on metadata and semantics for open repositories research information systems and data infrastructure track on metadata and semantics for agriculture food and environment track on metadata and semantics for cultural collections and applications track on European and national projects **Language** George Melville Bolling,Bernard Bloch,2004

Nominal Classification in Asia and Oceania Marc Allasonnière-Tang,Marcin Kilarski,2023-12-01 Linguists have long

been interested in systems of nominal classification due to their diverse functions as well as cognitive and cultural correlates. Among others, ongoing research has focused on semantic, functional, and morphosyntactic properties of complex systems such as co-occurring gender and numeral classifiers. Such approaches have typically focused on the languages of north-western South America and Papua New Guinea. This volume proposes to fill in a gap in existing research by focusing on Asia based on case studies from languages belonging to a wide range of families, i.e. Austroasiatic, Austronesian, Dravidian, Hmong-Mien, Indo-European, Mongolic, Sino-Tibetan, and Tai-Kadai, as well as the language isolate Nivkh. Gender and classifiers in these languages are approached within several different perspectives, i.e. functional, typological, and diachronic, thus revealing complex patterns in their lexical and pragmatic functions as well as origin, development, and loss. Describing and analysing such properties is a unique and innovative contribution of the volume.

Systems Of Nominal Classification Introduction

In today's digital age, the availability of Systems Of Nominal Classification books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Systems Of Nominal Classification books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Systems Of Nominal Classification books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Systems Of Nominal Classification versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Systems Of Nominal Classification books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Systems Of Nominal Classification books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Systems Of Nominal Classification books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals,

making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Systems Of Nominal Classification books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Systems Of Nominal Classification books and manuals for download and embark on your journey of knowledge?
