

Napoleonic Tactical Formations - French Infantry Battalion 1808-1815

An understrength French battalion of 600 men from 1808. Six companies/platoons each of about 100 men in 33 files and 3 ranks. The musketeers of each company occupy 18.5m x 6.975m; add another 1.3m depth for officers and NCOs behind the men making 18.5m x 2.3m. In line the battalion is 113.5m long and 2.3m deep. This would expand in combat up to 25% (138m). The column of march has the same maximum official length, i.e. 113.5m, but could be shorter. A column by divisions was two platoons wide (37m). The open column by divisions has a similar depth to its width (39.3m) to allow companies to wheel out of formation. Other columns are much more compressed with the close column being at most 6.9m deep. French doctrine of the time was to put the 2nd and 3rd platoons in the lead division to facilitate changes of formation; this was called an attack column (*colonne d'attaque*). Other nations, and earlier French practice, was to lead with the most senior company (grenadiers if present, otherwise 1st company of fusiliers). A column by platoons was only one platoon wide (18.5m).

Quimby,2015-11-06
Professor Emeritus Robert S Quimby examines the strategic and tactical revolution that swept through the French military hierarchy in the Eighteenth Century and forged the superb instrument that became lethal in the hands of Napoleon and his generals The period from the opening of the War of the Spanish Succession to the meeting of the Estates General is generally looked upon as a period of decadence in the history of the French Army Compared with the great days of Louis XIV or with those of the Revolution and Napoleon this estimate seems correct enough It was a period of many humiliations The disasters inflicted upon France by Marlborough and Prince Eugene were followed by the much more humiliating failures of the Seven Years War Yet the record is not without its glorious moments During the War of the Austrian Succession a series of brilliant successes was won under the leadership of the great Saxe If the combat record of the French Army was to say the least uneven during the eighteenth century such was not the case with its intellectual achievements The French Army stood foremost among all those of Europe in this respect Throughout most of the years of the century there was a great intellectual ferment within the Army leading to major developments in ideas and in material improvement Within a few years after the War of the Spanish Succession books began to appear pointing out defects in the tactics then in use and proposing changes After the Seven Years War the number of such books greatly increased The result was to stimulate an ardent and at times acrimonious debate Book countered book pamphlets and memorials multiplied Gradually through the abandonment of more extreme ideas a compromise was worked out Embodied in the Ordinance of 1791 this became the basis for the tactics of the Wars of the French Revolution and of Napoleon Introduction United States Naval Institute Proceedings ,1915 **United States Naval Institute Proceedings** United States Naval Institute,1916 **Tactics in the Chess Opening, Part 3**
French Defence Friso Nijboer,Geert Van Der Stricht,2005 This series covers the tactical themes and typical traps in ALL main line openings which are explained in carefully selected and annotated short games Tactics in the Chess Opening teaches how to recognise opportunities to attack early in the game and how to avoid standard pitfalls in the opening It will

make the adventurous player win more games and is a guide for further study and for setting up an opening repertoire
