## **Understanding Cognition:**

*Understanding Cognition* Peter J. Hampson, Peter E. Morris, 1996-01-09 *Understanding Cognition* provides a lively accessible and thorough introduction to this exciting and rapidly developing branch of psychology. It is intended primarily for first year undergraduates and for pre degree students who seek a deeper appreciation of contemporary cognitive psychology. The book is divided into three sections which cover the major structures, processing systems and mental operations involved in memory, perception, attention, skills and language cognition in action and approaches to modelling cognition including cognitive neuropsychology and connectionist approaches. Learning is supported throughout through the inclusion of reading lists, discussion questions, activities and case studies.

**Understanding Special Educational Needs and Disability in the Early Years** Janice Wearmouth, Abigail Gosling, Julie Beams, Stephanie Davydaitis, 2017-09-18 This key text provides essential tools for understanding legislation, policy, provision and practice for children in the early years, particularly young children with special educational needs and disability (SEND). Based on extensive research and the four areas of need as defined in the Special Educational Needs and Disability Code of Practice 0 to 25 Years (DfE 2015), the book charts the development of young children and their growing constructions of learning, communication, language, motor movement and emotion. Providing material that translates into practice in a straightforward and practical way, this text is packed full of personal accounts and case studies, enabling readers to appreciate what the experience of SEND in the early years means for families and professionals, and also to learn more about how they might understand and respond appropriately to a child's needs. *Understanding Special Educational Needs and Disability in the Early Years* will be of interest to students studying Early Years courses, families, SENDCOs, teachers and other staff supporting young children with a range of special educational needs and disabilities.

*The Metaphysics of Religion* Michael S. Jones, 2006 Lucian Blaga was an early twentieth century European philosopher whose work was suppressed at the height of his career by the creation of the Romanian Socialist Republic. Blaga's philosophical writings are rich and creative, spanning metaphysics, epistemology, philosophy of science, philosophical anthropology, aesthetics, philosophy of culture, philosophy of history and philosophy of religion. Mircea Eliade wrote that Blaga was the most gifted and critical original thinker in the history of Romanian philosophy. Because of historical circumstances, Blaga's philosophy has not become known outside of his own country, although within Romania it continues to be read and discussed. Were it to become known outside of Romania, Blaga's philosophy could provide interesting contributions to contemporary philosophical discussions. The thesis of this book is that Blaga's philosophy can make valuable contributions to contemporary Anglo American philosophy. In order to support this thesis, Blaga's philosophical system is explained in detail so that the reader may see how it can be applied to a variety of philosophical issues, philosophy of religion, in order to demonstrate that it can contribute to contemporary Anglo American discussions. Michael S. Jones is Assistant Professor of Philosophy at Liberty University.
