Understanding computers glossary of terms and a timeline of computer science

*Second Bibliographic Guide to the History of Computing, Computers, and the Information Processing Industry* James W. Cortada, 1996-01-30 Complementing the author's 1990 bibliography A Bibliographic Guide to the History of Computing Computers and the Information Processing Industry this bibliography provides 2 500 new citations covering all significant literature published since the late 1980s It includes all aspects of the subject biographies company histories industry studies product descriptions sociological studies industry directories and traditional monographic histories and covers all periods from the beginnings to the personal computer New to this volume is a chapter on the management of information processing operations useful to both historians and managers of information technology Together with the earlier bibliography this work provides the most comprehensive bibliographic guide to the history of computers computing and the information processing industry The organization of the book follows that of the earlier work with the addition of the new chapter on the management of information processing All entries are new to this volume Titles are annotated and each chapter begins with a short introduction A full table of contents and author and subject indexes enhance accessibility to the material

**Electronic Inventions and Discoveries** G.W.A Drummer, 2021-09-17 In a remarkably short time electronics has penetrated almost every aspect of modern life and the pace of development in the field shows no sign of slackening One of the first books to cover electronic inventions in depth

**Electronic Inventions and Discoveries** Electronics from Its Earliest Beginnings to the Present Day Fourth Edition traces the development of electronics from its earliest beginnings to the present day Spanning a period of two and a half centuries the book presents a mini encyclopedia full of valuable information on practically all inventions in electronics from 1745 to 1996 This fourth edition has been brought up to date and made more attractive by a complete redesign while still maintaining the successful features of previous editions The first nine chapters supply concise yet comprehensive histories of the main areas of the subject Subsequent chapters provide a list of inventions by subject and succinct descriptions of each invention in date order with over 1 000 references The book concludes with a list of acronyms and abbreviations a list of books on inventions and inventors and a comprehensive index During his seventy years in the field the author has collected a variety of published data to form an up to date systematic review of the major developments in electronics and the pattern of advances in electronic techniques The book forms an essential source of reference to practicing engineers wishing to broaden their knowledge Teachers and students who require a sound background and understanding of electronics will also find the book invaluable Written in an easily understood largely nontechnical language this fascinating and authoritative history of electronic developments will be of great interest to electronic hobbyists and general science readers
