**Understanding SMART Procurement in the MOD.** ,2000      **Understanding Smart Procurement in the Ministry of Defence** Tim Boyce,2000 The main thrust of this Report is on issues to do with strategy organization and processes The single most encouraging and exciting feature of the SMART procurement initiative is that it embraces the need to change the culture Riding on the back of New Labour is a commitment within the high political echelon of the MoD to make this change happen Probably the greatest single challenge is to ensure that this commitment is maintained through the inevitable changes of personality at the political and senior management level

**Retention of Title** Susan Singleton,2010 This briefing ensures that businesses are put in a position where they can recover goods by judicious use of a well drafted retention of title clause and ensure their terms and conditions apply and form part of the contract between the parties Sadly many of the disputes that occurred during the recession have come about because one or other party did not get their commercial deal down in writing at the start They started running a company without a shareholder agreement Or they supplied goods without any terms and conditions in writing Or they had terms but they omitted important legal issues Often saving half an hour of a lawyer s cost in the initial drafting stage means a company has 18 months of High Court litigation This briefing will light the way on how to ensure you retain title to goods

**British Weapons Acquisition Policy and the Futility of Reform** Warren A. Chin,2019-09-17 Originally published in 2004 This incisive work reveals the causes of escalating costs and delays in British defence procurement from 1945 to the present Tackling a complex subject in a straightforward and readable manner it considers how successive British governments reacted to this problem why they adopted the reforms they did and why these reforms failed to have any meaningful effect on the operation of this process The study draws upon a number of disciplines such as economics politics and science and engineering to provide a broad synthesis that allows the reader to understand the technicalities of the process The conclusion reached is that there is no apparent solution to the problem of intergenerational costs of weapons but that a key to controlling the growing cost of projects during their development lies in the construction of a more effective research and development strategy a path followed by Margaret Thatcher s predecessors and one that is also being advocated today      *The Economics of Defense Industry* Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous

assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis Asia-Pacific Defense and Security Outlook Kogila Balakrishnan,Zsolt Lazar,2023-06-20 The book focuses on the main security threats defence industry arms trade defence policies and military capabilities related issues in the Asia Pacific region There are only a very few regions in the world which have advanced so fast both economically and technologically as the Asia Pacific in the past few decades Probably this is one of the reasons why several countries in the region have gained confidence sharpened their diplomatic tone increased their defence expenditure invested into military capabilities and questioned both the local and global status quo The region contains emerging powers far reaching ambitions threatening rhetoric rising political tensions and concerns about military conflicts Factors that show that critical issues are at stake the reopening of long forgotten debates are more relevant than ever and masses of uncertainties are yet to be resolved This book will be of much interest to all students and scholars of Asia Pacific Security Asian politics and International Relations in general The chapters in this book were originally published as a special issue of Defense Security Analysis **Handbook of Human Systems Integration** Harold R.
