Logic and Structured Design for Computer Programmers Harold J. Rood, 2000 LOGIC AND STRUCTURED DESIGN is an introduction to the logic of data processing It is intended for those who plan but have not yet begun to study programming particularly those with little background in mathematics or logic The author avoids reference to specific programming languages isolating questions of logic from questions of syntax This approach enables readers to concentrate on the logic of problems The book walks readers through logical problems common to a variety of programming languages and provides the background in logic that many programming texts and courses assume
