switch		A small computer that keeps the packets in a network moving between devices and the Internet.
Internet		A machine that receives text and image data from a computer and prints it onto paper.
server		A device with connection ports for lots of other devices to connect to a computer network.
wireless connection		A large network of computers connected to each other all around the world.
client		A set of wires covered in insulating material that connect different devices so that they can communicate with one another.
printer		A system by which data is transmitted through radio signals instead of wires or cables.
