Annelies Wilder-Smith

Latest Carbon Footprint:

Carbon Footprints as Cultural-Ecological Metaphors Anita Girvan, 2017-10-10 Through an examination of carbon footprint metaphors this book demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor. The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change. Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor. This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter. As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts. This book will be of great interest to researchers and students of environmental humanities, political ecology, environmental communication and metaphor studies.

Reducing Your Own Carbon Footprint: Climate Change Has Your Footprint On It Gr. 5-8 George Graybill, 2017-05-18 This is the chapter slice *Climate Change Has Your Footprint On It Gr 5 8* from the full lesson plan *Reducing Your Own Carbon Footprint*. Engage students in global climate change by personalizing their own carbon footprint. Our resource introduces students to the effects of global climate change and its human related causes. Start with a detailed look at the greenhouse effect. Identify all the ways a kitchen uses energy. Break down the steps involved with farm to table and how each step adds to the carbon footprint. Calculate your travel footprint and learn ways to help reduce it. Understand that your carbon footprint doesn't lessen after throwing things out. Look at the bigger picture and calculate how your own carbon footprint fits with the community. Help reduce the carbon footprint by brainstorming ways to make environmentally friendly rules part of the social contract. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, carbon footprint calculator, crossword, word search, comprehension quiz, and answer key are also included.

Carbon Footprints and Food Systems Gareth Edwards-Jones, Michael Friis Jensen, 2010 Carbon accounting and labeling instruments present information on greenhouse gas emissions from supply chains. This report addresses carbon labeling schemes, a high profile issue that has important economic implications for developing countries. It analyzes current and emerging carbon labeling schemes and assesses available data.

Current Trends in Environmental Psychology, volume I, 2nd edition Giuseppe Carrus, Eugenio De Gregorio, Frederica Caffaro, Sabine Pirchio, Lorenza Tiberio, 2023-07-18 This Research Topic is linked to the 3rd International Conference of Environmental Psychology ICEP 2021 to be held in Siracusa, Italy, 4-9 October 2021. The ICEP is one of the most important scientific events in the global community for experienced scholars, junior researchers, and professionals working in the field of Environmental Psychology across the world. Submissions to this Research Topic welcome but are not limited to works that have been presented on site and virtually at

the ICEP 2021 Research Topic articles will be published immediately once accepted in the journal This Research Topic aims to promote the scientific debate over the most recent empirical findings and theoretical advances in Environmental Psychological science and to build evidence based knowledge and innovative approaches to understand the relationship between humans and their socio physical environments It aims at hosting empirical and theoretical works that contribute at advancing our scientific knowledge on some of the most urgent challenges of contemporary human society

The Environmental Impact of Sieben Linden Ecovillage Andrea Bocco, Martina Gerace, Susanna Pollini, 2019-01-10 The Open Access version of this book available at <https://www.taylorfrancis.com/books/9780367145644> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Environmental impact assessment is widely taught and researched but rarely covers both lifestyle and building construction in a town or neighbourhood This book provides a broad assessment of the environmental impact of the ecovillage Sieben Linden in Germany The ecovillage was founded in 1997 and has a population of over one hundred people This book shows how raising the awareness of individuals and adopting a consistent way of community living can be environmentally friendly This applies both to everyday practices and the way the houses in the ecovillage are built The tools used to measure the impact are Ecological Footprint and Carbon Footprint methodologies making use of indicators such as Primary Energy Intensity and Global Warming Potential Despite the difficulties encountered by using standardised methodologies these research tools provide an overall assessment and have allowed comparisons with selected similar cases and general values from statistic sources This book will be of great use to professionals and scholars in the fields of environmental impact assessment particularly at the town district city level and of city and ecovillage management It will particularly appeal to those engaged in a Sustainable Development Goal 11 perspective as well as environmental policy makers at the local level

The Carbon Footprint of Everything Mike Berners-Lee, 2022-04-26 I can't remember the last time I read a book that was more fascinating and useful and enjoyable Bill Bryson Reduce your carbon footprint and understand the issue with this up to date life guide for carbon conscious readers Kirkus Calculate your carbon footprint with an item by item breakdown Meet your company's carbon goals using the latest research Covid 19 and the carbon battle understand the new global supply chain The Carbon Footprint of Everything breaks items down by the amount of carbon they produce creating a calorie guide for the carbon conscious With engaging writing leading carbon expert Mike Berners Lee shares new carbon calculations based on recent research He considers the impact of the pandemic on the carbon battle especially the embattled global supply chain and adds items we didn't consider a decade ago like bitcoin and other cryptocurrencies Supported by solid research cross referenced with other expert sources illustrated with easy to follow charts and graphs and written with Berners Lee's trademark sense of humor The Carbon Footprint of Everything should be on everyone's bookshelf The Carbon Footprint of Everything is an extensively revised and updated edition of How Bad Are Bananas
