Stewart-Brown, Dr Tony Waterston, Dr  
Rachel Crowther**

## **Social Paediatrics:**

**Social Paediatrics** Bengt Lindström, Nick Spencer, 1995 This unique book takes a completely fresh approach to child health. The authors address the challenges of child health as embodied in the UN Convention on the Rights of the Child and the positive health targets of WHO's Health for All 2000 initiative. Throughout the book they use these as a theme around which to examine the effects of adverse social, political, environmental, and family influences on child health. *Social Paediatrics* provides an essential theoretical and philosophical framework for those wishing to face the challenge of enhancing life quality for all children and gives practical guidelines for all involved in child health issues. It is an indispensable source of information for every paediatrician. *Social paediatrics*, 1971. Paediatrics Simon Attard-Montalto, Vaskar Saha, 2006-01-01 This title is directed primarily towards health care professionals outside of the United States. The Master Medicine series of books are ideal for the new approach to teaching emphasising a core curriculum and self-directed learning. The content is restricted to the must-know core information and is presented in a synoptic style. The diagrams that support the text are in a style that students can remember and reproduce in exams. Each chapter ends with a selection of self-assessment material and full explanatory answers that consolidate and expand on the chapter contents. Concise text of the essential core material. Accompanying self-assessment material ideal for self-directed learning. Simple line drawings of a style that can be easily reproduced in examinations. Modern and appealing pages design. Many new style OSCE style questions increasingly used in examinations. Learning objectives are clear and helpful. Contents are short and to the point, ideal for clinical attachments. **Social and Community Paediatrics in Developing Countries** G. J. Ebrahim, 1985, Child Life Assessment Kathryn Cantrell, Cara Sisk, Brittany Wittenberg Camp, 2024-10-11 This textbook, the first to focus on child life assessment, educates seasoned child life specialists and child life students about the significant impact that robust psychosocial assessments have on child life interventions for children and families coping with hospitalization, chronic illness, and life transitions. Child life specialists engage in a cyclical process of assessment, planning, intervention, and evaluation to support healthy development and coping. The authors guide readers through current evidence-based child life assessment practices and propose future directions for the growing child life profession. The book opens with chapters discussing the foundations of child life assessment, including its history, moves to tools and approaches, then considers specific settings and populations, and concludes with future directions for the profession. Case examples and professional perspectives make explicit assessment applications to child life practice. **Child Public Health** Dr Mitch Blair, Professor Sarah Stewart-Brown, Dr Tony Waterston, Dr Rachel Crowther, 2010-01-21 Despite children making up around a quarter of the population, the first edition of this book was the first to focus on a public health approach to the health and sickness of children and young people. It combined clinical and academic perspectives to explore the current state of health of our children, the historical roots of the speciality, and the relationship between early infant and child health on later adult health.

Child public health is a rapidly developing field and is increasingly recognised throughout the world as a major area of focus for population health. Targeting the health of children now is essential if we are to achieve a healthy population as adults. For the second edition the text has been revised and updated with new material on health for all children, global warming, child participation systems, theory, refugees, commissioning and sustainable development. Child Public Health 2e will be of interest to public health practitioners, paediatricians, general practitioners with a child health and commissioning interest, and GP trainees. Whilst paediatricians are given a unique population perspective on their clinical specialty, public health professionals will gain a specialist insight into a specific population group, and primary care doctors, nurses, and managers will find support for their commissioning and clinical governance agendas.

*Contemporary Issues and the 21st Century Child* Andre Kurowski, Sandra Lyndon, 2024-10-09. This book is essential reading for any Early Years or Early Childhood Studies student. Bringing you up to date with latest developments and key issues, this book helps you to understand the child in relation to society. The book is divided into three parts which focus on the influence on childhood children's experiences and children's mind, with topics including The Digital Child, Childhood and Crime, The refugee crisis, Working therapeutically with Children. Taking a fresh approach, this book introduces the reader to interdisciplinary approaches to child development and extends thinking outside the traditional topics.

*Clinical Care for Homeless, Runaway and Refugee Youth* Curren Warf, Grant Charles, 2020-05-05. Adolescent homelessness is a growing problem that results in a variety of health challenges. This text is a practical resource designed to promote effective interdisciplinary health and social care interventions targeting adolescents who are homeless or at risk for homelessness. It is based on extensive interdisciplinary experience, reviews of pertinent research, and insights and contributions of leading professionals who are directly involved in the care of these young people. Divided into four main sections: Section 1, Chapters 1-7, section one is a review of the structure and professional involvement of program models targeting youth experiencing or at risk for homelessness to encourage broader understanding and utilization of principles and practices underlying effective programs and identify replicable components. Section 2, Chapters 8-16, Section two is clinically focused with recommendations for working with adolescents and youth experiencing homelessness and interventions for common and significant medical and mental health conditions and substance use disorders. Section 3, Chapter 17, Reviews international agreements regarding stabilization and care of refugee youth and families, description of experiences of refugee children and youth in developed countries, and an outline of conditions from which refugee youth and families have left. Section 4, Chapters 18 and 19, Engagement of homeless youth in research and future research directions to address needs of youth experiencing homelessness. Written by experts from a variety of disciplines.

*Clinical Care for Homeless, Runaway and Refugee Youth* is a first of its kind text for physicians, social workers, public health workers, and any other individual that works directly with these vulnerable populations.

*Practical Paediatric Problems* Jim Beattie, Robert Carachi, 2005-08-26. This innovative text modelled on the current RCPCH syllabus for paediatric

training provides all the information that the senior house officer and specialist registrar in paediatrics will need during training and when preparing for the MRCPCH examination A series of chapters discussing general principles in paediatric medicine is followed by a section covering the problems associated with the major body systems Each chapter within this latter section is divided into three elements Element A covers the background basic science to the particular problems being discussed in the chapter including basic embryology and anatomy biology and physiology A description of the techniques involved in investigation where these will be critical to the diagnoses that follow is also included here Element B presents the core system problems for the chapter Tables are provided to summarise the different causes classifications and differential diagnoses clinical features key investigations therapeutic options and outcomes Concise supporting text provides more detailed information where appropriate Selected short case histories are also included to highlight the key issues covered in the chapter Element C is a concise bibliography incorporating a short series of key primary papers and review articles and suggestions for further reading Subjects covered under general principles include developmental paediatrics behavioural issues and learning difficulties community paediatrics and clinical pharmacology Clinical chapters include the respiratory cardiovascular endocrine and all other body systems Haematology oncology psychiatry surgical problems and tropical paediatric medicine are also covered here All chapters contain up to date and appropriate information written by practising paediatricians who are each acknowledged specialists in their own field This textbook will fast become an indispensable guide to the specialty for all trainee paediatricians in preparation for the MRCPCH examination and beyond

*Textbook of Community Medicine* Rajvir Bhalwar, 2019-05-08 The third edition aims to fulfil the long standing need of the medical students for a concise textbook of community medicine which makes it an easy and interesting reading in lucid and simple English Contributed by 14 eminent teachers It comprehensively covers all the required topics explaining the concepts at length and stimulates analytical thinking The book seeks to encourage students to approach the subject with scientific logic and apply the learned concepts appropriately in the future during his her professional career
