**(Routledge Revivals)** Michael Phillipson, 2014-10-14 The field of crime and delinquency attracts a great deal of heated and partial opinion prejudice and other forms of mal thinking When there is a scientific approach there tends to be a psychological explanation This book first published in 1971 is a corrective to both trends It is a discussion of criminal behaviour in relation to a wide range of behaviours which could be called deviance and regards the whole field from the sociological point of view The whole discussion is related to social policy and is vital reading for students of sociology and criminology

**Social Defence**, 1965-07 Renewal Colbert Rhodes, 2017-07-11 Offering a deep look into the moral uncertainty in the contemporary social sciences and American society this book explores an in depth solution This solution as articulated by Pitirim A Sorokin in the 20th century is the theory of Integralism a perspective dating back to Plato Aristotle and Aquinas

Sorokin initially applied Integralism by locating and analyzing three dominant super socio cultural systems over 2500 years of Graeco Roman and Western history Each super system was unified by a central philosophical principle based either on materialism the senses or the rational or the supersensory super rational A super system declines when it reaches the limits of its potential to achieve its true reality and value to be replaced by another super system Sorokin described a trendless rotation of the three super socio cultural systems The current dominant super socio cultural system in the West is a materialist version emphasizing science and technology with little thought given to supersensory super rational reality Sorokin asserted contemporary materialist culture was in a state of collapse due to the breakup of its moral values As a consequence he saw a struggle for power occurring between egoistic individuals and groups often resulting in revolutions wars and inter human strife In response to the one sided materialist view of reality the goal of Integralism is to unify all three forms of reality into an integral culture that harmoniously balances materialist and supersensory super rational orientations A solution to the contemporary moral confusion Sorokin argued can be found in the application of supra conscious intuition that would enable a human to know what is eternal in the ordinary and reach the transcendent an experience not accessible to the senses or the rational intellect alone The supra conscious is the source for reaching the supreme moral value creative unselfish altruism which can be shared by all cultures to produce peace and harmony in the world

**Public Participation in Planning in India** Ashok Kumar,2016-12-14 Mirroring the complexities of cities and neighborhoods this volume makes a conscious departure from consensus oriented public participation to conflict resolving public participation In India planning practice generally involves citizens at different stages of plan making with a clear purpose of securing a consensus aimed at legitimizing the policy content of a development plan This book contests and challenges this consensus oriented view of citizen participation in planning arguing against the assertion that cities can be represented by a single public interest for which consensus is sought by planners and policy makers As such it replaces consensus centered rational planning models with Foucauldian and Lacanian models of planning to show that planning is riddled with a variety of spatial conflicts most of which are resolvable The book does not downplay differences of class and social and cultural identities of various kinds built on arbitrarily assumed public interest created erroneously by further assuming that the professionally trained planner is unbiased It moves from theory to practice through case studies which widens and deepens opportunities for public participation as new arenas beyond the processes of preparation of development plans are highlighted The book also argues that spaces of public participation in planning are shrinking For example city development plans promoted under the erstwhile JNNUM programme and several other neoliberal policy regime initiatives have reduced the quality as well as the extent of participatory practices in planning The end result of this is that legally mandated participatory spaces are being used by powerful interests to pursue the neoliberal agenda The volume is divided into three main parts The first part deals with the theory and history of public participation and governance in planning in India and the second presents real life case studies related to planning at a regional level in order to describe and empirically explore some of the theoretical arguments made in the first The third section provides analyses of selected case studies at a local level An introduction and conclusions along with insights for the future provide a coherent envelope to the book
