

# Socialist Planning By Michael Ellman

## Notes

### Chapter 2: The Traditional Model

(1.) The main features of the socialist traditional model, according to economists Włodzimierz Brus, Gregory Grossman, and János Kornai, were broadly as follows:

1. **State ownership of the means of production**
2. **Political dictatorship (mainly dictatorship of the proletariat)**
3. **A mono-hierarchical system (state ownership of means of production with political dictatorship)**
4. **Imperative planning**
5. **A subordinate role for money, profit, prices, and banks**

(2.) The proletariat as a whole cannot exercise dictatorship, thus a unifying representative body must be established. This dictatorship has numerous economic consequences:

1. **Feedback:** Feedback was often suppressed and censored in order to hide often disastrous consequences from many policies, one being from the collectivisation of agriculture in the USSR.
2. **Waste:** There exists two types of waste, that being waste from counterproductive central policies and waste from unintended responses to central policies. Examples for the former include the economic crisis of 1931-3 in the USSR, economic crisis of 1958-62 in China, economic crisis of 1979-80 in Poland, and the decline in labour productivity in Cuba in the 60's and poverty and unemployment in Vietnam in the 70's and 80's. For the latter, examples mainly include from the reaction of "non-labour income campaigns" of 1986; food and housing situations worsened and many soviet cities, which continued to get worse when local officials prevented the delivery of food products that were grown on private land, as well as disallowing individuals to spare additional rooms in flats.
3. **Party Mindedness:** Since all problems must be carried out from the point of view of the party, one particular issue came about:

**Maurice Dobb**

## **Socialist Planning:**

**Socialist Planning: Some Problems** Maurice Dobb, 1970      *Socialist Planning* Michael Ellman, 2014-10-06 Socialist planning played an enormous role in the economic and political history of the twentieth century Beginning in the USSR it spread round the world It influenced economic institutions and economic policy in countries as varied as Bulgaria USA China Japan India Poland and France How did it work What were its weaknesses and strengths What is its legacy for the twenty first century Now in its third edition this textbook is fully updated to cover the findings of the period since the collapse of the USSR It provides an overview of socialist planning explains the underlying theory and its limitations looks at its implementation in various sectors of the economy and places developments in their historical context A new chapter analyses how planning worked in the defence industrial complex This book is an ideal text for undergraduate and graduate students taking courses in comparative economic systems and twentieth century economic history      **Socialist Planning** Ellman, 1979-07-05 This revised edition has been updated to cover decollectivization in China the Gorbachev reforms in the Soviet Union the Polish economic crisis of 1979 82 as well as recent theoretical work by economists politicians      *Socialist Planning and a Socialist Program* Harry Wellington Laidler, 1932      The Politics of Planning Daniel Ritschel, 1997 The idea of economic planning was a central theme of the radical economic policy debate in the 1930s Born of the inter war economic crisis the call for the reconstruction of the economy according to a plan of one kind or another spanned practically the entire spectrum of the politics of the day The fashion for planning is often seen as the seedbed of the Keynesian revolution and the Butskellite consensus of the next decade Yet planning was neither uniformly Keynesian nor in fact indicative of political agreement over economic policy Beneath the shared language of planning the radical economic debate was riven by the same ideological rifts which dominated the more conventional political scene Dr Ritschel traces the many interpretations of planning and examines the process of ideological construction and dissemination of the new economic ideas He finishes with an explanation of the planners retreat late in the decade from the divisive economics of planning towards the less ambitious but also far less contentious alternative the middle way of Keynesian economics      Development and Globalization David F. Ruccio, 2012-12-06 Since the mid 1980s David F Ruccio has been developing a new framework of Marxian class analysis and applying it to various issues in socialist planning Third World development and capitalist globalization The aim of this collection is to show through a series of concrete examples how Marxian class analysis can be used to challenge existing modes of thought and to produce new insights about the problems of capitalist development and the possibilities of imagining and creating noncapitalist economies The book consists of fifteen essays plus an introductory chapter situating the author's work in a larger intellectual and political context The topics covered range from planning theory to the role of the state in the Nicaraguan Revolution from radical theories of underdevelopment to the Third World debt crisis and from a critical engagement with regulation theory to contemporary discussions of globalization and imperialism      **Towards a History of**

**the Theory of Socialist Planning** Peter J. Boettke, 2015 This set of volumes has two practical purposes First to provide scholars with a coherent set of readings which captures all of the main contributions to the debate on socialist planning Second to demonstrate through the selection of readings that the theory and history of socialist planning must be studied simultaneously and not separately if we are to improve our understanding of the history and collapse of socialism in the twentieth century The purpose of theory is to do history and history unguided by theory is not possible All historical accounts are guided by theory and the question is not theory versus no theory but articulated versus non articulated theory Articulated theory is what is necessary to advance understanding while non articulated theory tends to cloud understanding *Planning and Profits in Socialist Economies* Jean Charles Asselain, 2003 This study of economic reforms throughout Eastern Europe covers the history of attempts at decentralization Countries covered include the former USSR the former East Germany and Hungary *Planning and Development of Key Sectors in India: Formulation and implementation of economic planning* Devendra Thakur, 1991 **Socialist Management & Planning** Nicolas Spulber, 1971 Comparison of economic planning and systems of economic administration in socialist countries and the role of USSR therein covers marx s economic theory and its application in the USSR collective economy examines investments prices economic development strategies different forms of management agrarian reforms trade agreements between CMEA countries international relations industrialization etc References and statistical tables Lectures on the Theory of Socialist Planning Janusz G. Zieliński, Nigerian Institute of Social and Economic Research, 1968 Are There Laws of Planning? Socialist Planning and Its Relevance to Mixed Economics United Arab Republic, Janusz G. Zinlinski, 1966 *Bulletin of the British Library of Political and Economic Science* British Library of Political and Economic Science, 1926 **Readings in Public Economics and Planning** S. Grandrasekhar, S. Chandrasekhar, 1985 **Socialism and the Market: Collectivist economic planning** Peter J. Boettke, 2001 The Town Planning Review , 1921 **Industrial and Labor Problems ...** Russell Sage Foundation. Library, 1928 *Report* Russell Sage Foundation. Library, 1929 **Meanjin Papers** Clement Byrne Christesen, 1916 The Planners and the Peasants Steven L. Sampson, 1982
