**Calvino and the Age of Neorealism**, 1990-08 Italo Calvino's reputation as one of the great writers of our century rests chiefly on his allegorical fables and fantastic narratives whose inventiveness irreverence and elegant style are universally admired In this study the author focuses on Calvino's first novel *The Path to the Nest of Spiders* 1947 because in it she discerns a critical point of origin for Calvino's entire ethics of writing She shows how in *The Path* he challenges the poetics of objectivity of the Italian neorealists movement and offers a complex and ironic representation of the anti Fascist armed resistance in Italy Situating Calvino's early work in its historical and cultural context the author reassesses Italian neorealism in terms of the theories and critical debates about realism of such critics as Lukacs Sartre Brecht Adorno and Barthes She analyzes neorealism's narrative practices and cultural and political implications while setting neorealism in the context of the resistance and the postwar Reconstruction in Italy and giving readings of major neorealist texts novels by Pavese and Vittorini films by Rossellini Visconti and others as well as relatively obscure minor ones The heart of the book consists of readings of *The Path* from four different but intersecting critical perspectives formalist narratological sociohistorical psychoanalytic and Bakhtinian The readings assess the importance of Calvino's beginnings for the body of his work and incorporate relevant references to his later fiction and critical essays Out of these multiple readings the ironic estrangement of the real through the act of writing itself emerges as his key narratological strategy

*The Path to the Spiders' Nests* Italo Calvino, 2000-05-30 Italo Calvino was only twenty three when he first published this bold and imaginative novel It tells the story of Pin a cobbler's apprentice in a town on the Ligurian coast during World War II He lives with his sister a prostitute and spends as much time as he can at a seedy bar where he amuses the adult patrons After a mishap with a Nazi soldier Pin becomes involved with a band of partisans Calvino's portrayal of these characters seen through the eyes of a child is not only a revealing commentary on the Italian resistance but an insightful coming of age story Updated to include changes from Calvino's definitive Italian edition previously censored passages and his newly translated unabridged preface in which Calvino brilliantly critiques and places into historical context his own youthful work *The Path to the Spiders Nests* is animated by the formidable imagination that has made Italo Calvino one of the most respected writers of our time

**Spider Behaviour** Marie Elisabeth Herberstein,2011-01-27 Spiders are often underestimated as suitable behavioural models because of the general belief that due to their small brains their behaviour is innate and mostly invariable Challenging this assumption this fascinating book shows that rather than having a limited behavioural repertoire spiders show surprising cognitive abilities changing their behaviour to suit their situational needs The team of authors unravels the considerable intra specific as well as intra individual variability and plasticity in different behaviours ranging from foraging and web building to communication and courtship An introductory chapter on spider biology systematics and evolution provides the reader with the necessary background information to understand the discussed behaviours and helps to place them into an evolutionary context Highlighting an under explored area of behaviour this book will provide new ideas for behavioural researchers and students unfamiliar with spiders as well as a valuable resource for those already working in this intriguing field

*Calvino's Fictions* Kathryn Hume,1992 Throughout the novels and stories The cosmicomical tales with their focus on science are seen as crucial to the development of the symbolic mindscapes that made Calvino a major international writer He died before arriving at any satisfactory solution to the problems of relating the I to the not I but Hume derives from his later works a philosophy based on the creation of likenesses of internal microcosms that permit us to mirror the macrocosm These interior
