Turbulent Years:

Turbulent Years Irving Bernstein, 1970 The second volume of Irving Bernstein's History of the American Worker is concerned with the struggle of labor under the New Deal 1933-1941. In these years labor recovered from the early days of the Great Depression and became a dominant force in American politics and society. We see the effect of Franklin Roosevelt's election and the influence of labor in assuring the passage of the National Industrial Recovery Act and its subsequent defeat in the Supreme Court, the rising power of unions and their invasion of new industrial fields leading to discontent within the A. F. of L. and ultimately to the formation of the CIO. Labor's new weapon, the sit-down strike, is described vividly along with the government's puzzled reaction. The Wagner Act, labor's charter of liberty, is traced through its passage and operation. Finally, we see the split between Roosevelt and John L. Lewis leading to Lewis' support of Willkie in the 1940 election. With the attack on Pearl Harbor, American labor's history took a new turn, and with it, this volume closes. From publisher description.

Narratives of Vulnerability in Museums Meighen Katz, 2019-06-19 Narratives of Vulnerability in Museums is a study of the challenges museums face when they present narratives of instability, uncertainty, and fear in their exhibitions. As a period of sustained societal and personal vulnerability, the Great Depression remains a watershed era in American history. It is an era when iconic visual culture of deprivation mixes in the popular imagination with groundbreaking government policy and has immense potential for museums, but this is accompanied by significant challenges. Analysing a range of case studies, the book explores both the successes and obstacles involved in translating historical narratives of vulnerability to the exhibition floor. Incorporating an innovative trans-genre museological model, the book draws connections between exhibitions of history, art, and technology, as well as heritage sites focused on a single era. Employing interpretations of housing preserved and reconstructed to discuss ideas of belonging and community, the book also examines the power of the iconic national story and the struggle for local relevance through discussions on strikes and industrial action. Finally, it examines the use of fine art in history exhibitions to access the emotional aspects of historical experience. The result is a volume that considers both how societies talk about less celebratory aspects of history, but also the expectations placed on museums as interpreters of the public narrative and agents of change. Narratives of Vulnerability in Museums makes a significant contribution to discourses of museum and heritage studies, of interwar history, of the social role of cultural institutions, and to vulnerability and resilience studies. As such, it should be essential reading for scholars and students working in these disciplines, as well as architecture, cultural studies, and human geography.

Turbulent Years Isaac Frederick Marcossou, 1969 *The Democratic Wish* James A. Morone, 1998-01-01 This prize-winning book reinterprets more than 200 years of American political history as the interplay between the public's dread of government power and its yearning for communal democracy. James Morone argues that Americans will never solve their collective problems as long as they instinctively fear all public power as a threat to liberty. This revised edition includes a new final chapter about contemporary populism, government bashing, and democratic
