The Architecture and Biology of Soils Karl Ritz, Iain Young, 2011 Soil is a fundamental and critical component of terrestrial ecosystems but one that is often overlooked It is an extremely complex environment both in terms of its physical structure and in that it supports levels of biodiversity far greater than those found above ground in any ecosystem Bringing together existing knowledge across many areas of soil biology and physics this book develops the concept of soil architecture and explores key characteristics of the remarkable inner space of the soil The authors consider how such structure develops through time and the consequences this has for life underground They also explore the interactions between the biological and physical components of the soil and how they relate to its many functions in order to demonstrate the key role of soil architecture in underpinning ecosystem dynamics The diverse but richly interrelated perspectives offered in this book make it an essential resource for researchers and students in soil and environmental sciences terrestrial ecology plant sciences and microbiology

Plant User Handbook James Hitchmough, Ken Fieldhouse, 2008-04-15 Professional landscapers and all those involved in creating green spaces have long been in need of a book that is a guide to plant specification but also makes sense of plants and their cultivation Plant User Handbook is for practitioners who are professionally engaged in the use of plants in public commercial and institutional landscapes Planting schemes are undertaken on the basis of a binding contract generally between the client who owns or leases the landscape and the implementer the landscape contractor with the designer acting both as specifier and contract administrator Within this contractual relationship planting schemes must be implemented to an agreed timetable To manage this procedure efficiently landscape designers and managers need quick access to the factual and scientific background for practical planting design and its implementation through specification writing and contracts The book covers over 20 well defined topics and is written by leading experts in the industry It is arranged into five sections Preliminaries to plant use and the landscape Managing plant growth on landscape sites Establishment and management of trees Establishment and management of smaller woody plants Establishment and management of herbaceous plants Carefully illustrated with diagrams black and white photographs and colour plates this handbook provides a unique resource for professionals wanting to improve their specification skills as well as to explore creative approaches to design and practical implementation
