Rondinelli, 2019-06-30 Widely accepted principles and assumptions of American planning theory come under heavy fire in this refreshing and provocative book The author s main contention is that contrary to current supposition development planning is in practice a highly political activity Professor Rondinelli maintains that it is because the dynamics of the policy making process are not properly understood that current planning prescriptions are inadequate when they are applied within organizationally complex urban regions To illustrate his argument he offers a case history of federally aided redevelopment programs for an urban region in northeastern Pennsylvania that experienced three decades of economic decline He further believes that existing programs of planning education do not provide the skills knowledge and experience necessary for effective management of urban change Curricula must be reoriented he says if planners are to have an impact on future urban and regional development Finally he sets forth positive alternatives to current planning processes stressing the need for planning theory and practice that recognize and cope with the characteristics of the complex policy making system
