Scott,2017-07-05 This inter disciplinary book adopts an all Ireland perspective to investigate the tension that exists between sustainable urban development values and rhetoric such as increased densities brown field development the compact city and social inclusion and the emerging geography of urban Ireland influenced by consumer and lifestyle choices **The Urban Community** American Sociological Society,1926 **Primary Health Care in Urban Communities** Beverly Jane McElmurry,Cynthia Tyska,Randy Spreen Parker,1999 Explores the efficacy of primary care concepts in real world situations Written collaboratively by academics and community leaders it details partnerships forged between health professionals institutions local governments and organizations to provide accessible acceptable and affordable health services to underserved populations The contributors document the lessons learned from working with community advocates in a variety of settings in order to form bridges across the boundaries of the disparate worlds in which we live Annotation copyrighted by Book News Inc Portland OR THE TRANSITION OF DANWEI-COMMUNITY AND URBAN COMMUNITY REBUILDING Tian Yi-Peng,2021-11-18 In this work the author endeavors to treat Danwei system as a special and highly organized form of community and sets about his study from the perspectives of Danwei community s change and urban community reconstruction When it comes to the construction and development of urban communities in contemporary China academic circles at home often attempt to unravel its intimate and indissoluble connection with Danwei system and seek to lay emphasis upon the great complexity of their interactive relationship with each other However academic circles generally incorporate Danwei system taken as a national system as well as a universal institution into their fields of research whereas they rarely enter into a critical examination of the variations in its multiplicity of specific denotations by taking account of such variables as space region and culture nor do they show much concern about the existence of different types of Danwei In view of the foregoing difficulties in which the study of Danwei system gets entangled this study attempts to accomplish the following main purposes Firstly this study shall introduce such a variable as locality into the research on Danwei community by starting off from the research perspectives of Danwei community s origin formation and change Secondly several super large industrial communities in the old industrial bases shall be chosen as classic cases in illustration of long standing complications and entanglements enmeshed in this study And thirdly it seeks to reveal the mode and experience of urban community development against a background of Danwei system reform so that by gaining a full understanding of as well as making an in depth analysis of their rich implications we can enrich the theory of urban community construction in the Chinese context and hence grapple successfully with some theoretical problems confronting urban community reconstruction against a background of Danwei community change which shall eventually bring about a smooth transition of Danwei society This book will assuredly open an exceptional window to the transition of China from traditional to modern society the transition of Chinese society from planned economy to market economy and the change track of the interplay between the Chinese government and modern Chinese society after the founding of New China in 1949 at the present time and even in

the foreseeable future     Decade of Change: from the Urban Community Development Office to the Community Organization Development Institute in Thailand, A Somsook Boonyabanha,2002     Crime Prevention in the Urban Community Kōichi Miyazawa, Setsuo Miyazawa,1995-04-30 One of today's most pressing issues in criminology and crime prevention is the problem of crime in our cities and towns and its prevention The topic of crime prevention in the Urban Community was discussed at the 47th International Course of the International Society for Criminology ISC held at Chuo University Tokyo It was the very first time such an ISC meeting was held in Asia and this meant that finally a relatively large number of Japanese and other Asian participants were able to express their views on criminal policy and crime prevention in urban centres all over the world Crime in urban communities is not an exclusively Western phenomenon but it is also a considerable problem in other parts of the world This makes an interchange of ideas between Western Eastern and Third World criminologists particularly important General characteristics of the urban communities that suffer from a high crime rate are ethnic and racial tensions a mix of old housing areas and new business districts a prevailing sense of anonymity slums and juvenile delinquency The existence of these general characteristics besides mutual differences makes cooperation in the crime prevention sphere definitely worth the effort

resources and opportunities Why study urban communities 1 The world is becoming more urbanized three fourths of the population will reside in urban areas according to the United Nations 2 In the United States the growth of cities and surrounding suburban areas is significantly changing our demographics 3 The growth of metropolitan areas in terms of space and population challenges both local and regional political and governance systems because diverse communities have varying needs development 4 We are constantly learning about the environmental consequences of how we live we will need to find innovative ways to accommodate the metropolitan growth while building environmentally sustainable communities Dr Malo Andre Hutson s research focuses on community and economic development urban sustainability and population health He earned both his bachelor s degree in sociology and master s degree in city and regional planning at the University of California at Berkeley He earned his doctorate in the School of Architecture and Planning at the Massachusetts Institute of Technology MIT He is also a former Robert Wood Johnson Health and Society Scholar at the University of Michigan s Center for Social Epidemiology and Population Health in the School of Public Health Dr Hutson is currently an assistant professor in the Department of City and Regional Planning at the University of California at Berkeley *Papers and Proceedings American Sociological Society.
