Urban Transit Lave,1985-01-01 **Urban Transit** Charles A. Lave,1985-01-01 This book assembles the work of 15 scholars transit managers and labor relations experts whose in depth examination of this critical subject focuses on the economics of transit matters the possible alternative modes of urban transit and the economic and political problems of implementing changes The authors conclude that private free market forms of transit have the only reasonable chance to solve urban transit problems and they offer policy alternatives that challenge the current public failure of monopolized transit systems This book provides a comprehensive discussion of the evolution of public transportation problems and policy responses drawing extensively from documented cases throughout the country It is a sourcebook of workable remedies to effect consequential and imperative changes in this increasingly crisis prone issue Public-private Policy Partnerships Pauline Vaillancourt Rosenau,2000 The first book to evaluate public private partnerships in a broad range of policy areas

ITF Round Tables Privatisation and Regulation of Urban Transit Systems International Transport Forum,2008-10-23 Examines experience in integrating private management and capital with public transport policy objectives in a number of developed economies Going Private José A. Gómez-Ibáñez,John R. Meyer,2011-10-01 In the last decade many countries turned to private sources to provide services formerly offered by public agencies Europeans particularly the British and the French were leaders in this movement Developing countries also experimented extensively with privatization in the 1980s with varying degrees of success Because governments around the world are heavily involved in transportation it is a natural focus of privatization experiments and in many ways has been at the cutting edge Going Private examines the diverse privatization experiences of transportation services and facilities Cases are drawn from the United States Asia Europe and Latin America Since almost every country has experimented to some degree with highway and bus privatization the authors focus particularly on these services although they also discuss urban rail transit and airports Highways and buses they explain encompass all three of the most common and basic forms of privatization the sale of an exi *Suburban Gridlock* Robert Cervero,2013-01-01 Originally published New Brunswick NJ Center for Urban Policy Research c1986 *Urban Transportation Abstracts* ,1985 Driving Forces James A. Dunn,2010-12-01 To its critics the automobile is a voracious consumer of irreplaceable energy resources a leading polluter of the environment and a destroyer of cohesive communities The most outspoken opponents call for greater regulations and restrictions to ultimately replace the automobile as the country s primary means of transportation But their proposals all ignore one simple fact Americans love their cars Millions of citizens have made the automobile the most successful method of mass transportation ever developed and they are not about to give up the personal mobility it offers This book presents the controversial view that for the vast majority of Americans the automobile is not the problem but the solution to transportation needs While acknowledging the automobile s significant drawbacks the author refutes much of the shrill rhetoric and doomsday predictions of its opponents He takes a skeptical look

at the major policy initiatives to tax regulate and provide alternatives to the automobile pointing out that any policies designed to remove Americans from their cars without offering them a superior means of mobility are worse than useless and doomed to failure The book offers suggestions and guidelines for politically realistic initiatives that preserve the benefits of the automobile while building public support for policies that will reduce its negative effects on energy use and the environment
