Urban Voodoo:

Urban Voodoo Christopher S. Hyatt, S. Jason Black, 2008 This book fills a long standing need in the literature Voodoo Santeria and Macumba as practised today in cities throughout the Western world It is not another history or sociological study but a candid personal account by two who came to the religion from the outside It includes descriptions of the phenomena triggered by Voodoo practice divination techniques spells and a method of self initiation *Urban Voodoo* Edgardo Cozarinsky, 1990 Written in the deforming mirror of a foreigner s English Cozarinsky s fourteen verbal postcards translate an exile s personal experience into public deja vu while his cinematic novella whisks his character through a political and cultural looking glass by means of special effects that make the world a hemisphere away familiarly strange

Urban Voodoo S. Jason Black, Christopher S. Hyatt, 199? Never Any End to Paris Enrique Vila-Matas, 2012-06-20 A splendid ironic portrayal of literary Paris and of a young writer s struggles by one of Spain s most eminent authors This brilliantly ironic novel about literature and writing in Vila Matas s trademark witty and erudite style is told in the form of a lecture delivered by a novelist clearly a version of the author himself The lecturer tells of his two year stint living in Marguerite Duras s garret during the seventies spending time with writers intellectuals and eccentrics and trying to make it as a creator of literature I went to Paris and was very poor and very unhappy Encountering such luminaries as Duras Roland Barthes Georges Perec Sergio Pitol Samuel Beckett and Juan Mars our narrator embarks on a novel whose text will kill its readers and put him on a footing with his beloved Hemingway Never Any End to Paris takes its title from a refrain in A Moveable Feast What emerges is a fabulous portrait of intellectual life in Paris that with humor and penetrating insight investigates the role of literature in our lives

Literature & the American Urban Experience Michael C. Jaye, Ann Chalmers Watts, 1981 **HEALTH CARE ORGANIZATION AND PROJECT MANAGEMENT FOR EMERGING NATIONS** Edward Khiwa PhD, 2013-02-04 SUMMARY Every nation should determine the future and the goals of public health inn protecting its population As Western nations such as tobacco companies of the United States Britain and others are improving their gross national products they are instead exporting a major public health burden to the Emerging nations mostly various kinds of cancer especially lung cancer which has had a high toll of mortality to the populations of different nations of the world The World Health Organization after decades and billions of dollars later lost the fight against Malaria The world has surrendered to the disease Nothing left in the world except old wives tales type of pseudo preventative measures that does nothing except put the population in a form of false security The fight not only lost but the enemy has actually become stronger and we have nothing to further combat it it is a raging fire that onsumes without mercy For many years the drug of choice was Chloroquine or quinine During the Korean war in the 1950 s many troops of an African or Mediterranean ethnic origin have exhibited severe allergic reaction to quinine There it was discontinued and only Chloroquine was used After many decades of Chloroquine use and misuse of Chloroquine resistant strain of Malaria made its

appearance on the scientific scene in Southeast Asia and later the African continent To date there is no medication available for the resistant Malaria The best we have is a prophylactic dose of Chloroquine prior to traveling to an endemic area This is still an effective measure only in the Americas where the Malaria is still sensitive to chloroquine The resistant strain has a very wide range It has been observed as far east as Afghanistan and Kazakhstan and as west as West Africa The death rate is very high because of several common denominators Most of these countries are over populated poor health care programs no preventative programs mostly illiterate population and most importantly very poor economic status These countries mostly rely on outside help from the industrialized nations or the United Nation health care arm WHO Consistent factors of all outside aid program they are very costly usually without previous careful long rang impact studies in most cases are very short lived The result in most cases is disastrous the needy country usually is left with a white elephant health care program that is a failure and cannot afford to maintain on their own either from a technical standpoint or from a financial shortage For a long time we believed that more is bigger and better and the rest is history Malnutrition further complicates the picture complicates the picture In economically poor counties their people are not able to take the proper nutrients to sustain good status of health The malnourishment affects the immune system which as a result renders the population of the endemic areas with higher propensity to contract Malaria and other diseases as well These conditions combined results in the outcome of increased incidence of the disease and shorter life expectancy of the patients Furthermore the disease s vector Mosquito has become more resistant to eradication efforts and as a result its range has become increasingly greater every year For many years the spray methods of wetlands stagnant pools and slow flowing streams have proven useless Yet these methods continue Why The answer is very simple it is cheap available easily applied and most importantly politically convenient But the reality is that these methods are a dismal failure one only has to look at the numbers increased incidence of Malaria and the increased range of the vector Poor sanitary practice due to lack of education and the financial means to build water treatment facilities or even the ability to supply fresh clean water have contributed to the spread of the most preventable of diseases Cholera disease caused by
