McDonnell F-4 Phantom Gerard Paloque,2010-05-01 Shortly after the US Navy put the F 4H 1 Phantom II into service in 1960 the US Air Force in turn took an interest in it After a successful comparison with the best machines of the period it was decided at the beginning of 1962 to use it as the standard tactical fighter It was in May 1963 that the first USAF F 4C overall similar to the Navy version made its first flight and exceeded Mach 2 Several versions and variants of the twin engine fighter were produced over almost ten years taking advantage each time of the progress made in avionics power plants and armament with the original all missile concept being eventually put aside in the light of the fighting in South East Asia in which the aircraft took an active part in exchange for an on board weapon which turned out to be very effective both in the aerial combat and ground attack roles Apart from the USAF and the various units of the Air National Guard or the United States Reserve which used the 2 600 F 4s up to the middle of the 90s especially for recce or electronic warfare the Phantom IIs were also very successful in the export markets since more than 1 200 examples were flown by ten or so countries especially NATO ones Some like Japan even built them under license in large numbers and many like Israel and Iran often used them successfully in combat

Aircraft of The Royal Australian Air Force Air Force History Branch,2021-06-01 Aircraft of The Royal Australian Air Force tells the story of the RAAF s first one hundred years by describing the acquisition operation and service record of the multitude of aircraft types flown by the RAAF The 176 aircraft types include the flimsy wood and canvas aircraft typical of World War I through the technological advances during and after World War II to modern fifth generation complex aircraft like the F 35 Lightning II Even before its formation Sir Richard Williams the Father of the RAAF had decided to employ an alpha numeric numbering system to identify and account for each aircraft in service This system started with A1 A2 A3 etc as each type of aircraft came into service Each individual aircraft within each series was identified as A1 1 A1 2 and so on and the aircraft serial became known colloquially as the A number With some exceptions over the century since the A number system started aircraft entered RAAF service in broadly the sequence of the A numbers and so this book is intended to assist in charting the 100 year history of the RAAF by listing aircraft operated in A number sequence rather than by listing them by role such as Fighter Bomber Maritime Trainer Transport etc or alphabetically by name or by manufacturer The inclusion of a comprehensive Index and the Quick Reference Guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its A number Aircraft of The Royal Australian

The Hunter Killers Dan Hampton,2015-06-02 At the height of the Cold War America s most elite aviators bravely volunteered for a covert program aimed at eliminating an impossible new threat Half never returned All became legends From New York Times bestselling author Dan Hampton comes one of the most extraordinary untold stories of aviation history Vietnam 1965 On July 24 a USAF F 4 Phantom jet was suddenly blown from the sky by a mysterious and lethal weapon a Soviet SA 2 surface to air missile SAM launched by Russian advisors to North Vietnam Three days later six F 105 Thunderchiefs were brought down trying to avenge the Phantom More tragic losses followed establishing the enemy s SAMs as the deadliest anti aircraft threat in history and dramatically turning the tables of Cold War air superiority in favor of Soviet technology Stunned and desperately searching for answers the Pentagon ordered a top secret program called Wild Weasel I to counter the SAM problem fast So it came to be that a small group of maverick fighter pilots and Electronic Warfare Officers volunteered to fly behind enemy lines and into the teeth of the threat To most it seemed a suicide mission but they beat the door down to join Those who survived the 50 percent casualty rate would revolutionize warfare forever You gotta be sh ing me This immortal phrase was uttered by Captain Jack Donovan when the Wild Weasel concept was first explained to him You want me to fly in the back of a little tiny fighter aircraft with a crazy fighter pilot who thinks he s invincible home in on a SAM site in North Vietnam and shoot it before it shoots me Based on unprecedented firsthand interviews with Wild Weasel veterans and previously unseen personal papers and declassified documents from both sides of the conflict as well as Dan Hampton s own experience as a highly decorated F 16 Wild Weasel pilot **The Hunter Killers** is a gripping cockpit level chronicle of the first generation Weasels the remarkable band of aviators who faced head on the advanced Soviet missile technology that was decimating fellow American pilots over the skies of Vietnam

Striving for Air Superiority Craig C. Hannah,2002 Annotation Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic

air forces rarely has a state given equal weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War recovered briefly over Korea then slid into obsolescence during the 1950s His explanation of why America s fighter aircraft did not work in Vietnam is instructive and unsettling Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world He side steps politics and inter service rivalries to focus on the nuts and bolts of tactical air power The result is a factual informative account of how an air force first loses its way then finds its mission again **McDonnell Douglas** Bill Yenne,1985 [Air Pictorial](#),2002
