Backer,Kirk B. O'Hara,1991-06-30 Since 1986 when America s current perception of a drug abuse crisis in the workplace began many challenges and potential solutions have been identified As we enter the 1990s real progress in awareness and action has been made in many public and private American workplaces However the most important accomplishment actual reduction in the number of persons using drugs in the workforce is considerably more difficult to achieve Research is being conducted in a number of employment settings to document how this can be done While the results to date are encouraging it is also clear that much remains to be done Evidence from the national research reported in this book shows that many organizations regard their achievements on this front as modest at best even though they have installed systematic programs aimed at reducing the problems of worker drug abuse The organizational change approach required to achieve drug free workplaces is the main subject of this book Based upon findings from a three year national research study Thomas Backer and Kirk O Hara examine what has been done to combat drug abuse in the workplace They place the results of their inquiry within the larger context of organizational change theory The critical secondary issues of responses to AIDS in the workplace and containing employer health care costs through managed care are also addressed This book s focus on programmatic responses to workplace drug abuse at the day to day implementation level will be welcomed by substance abuse professionals designers and directors of employee assistance programs human resources and
