Coworking Spaces Tips:

Coworking Spaces Janet Merkel, Dimitris Pettas, Vasilis Avdikos, 2023-11-07 This contributed volume considers the emergence of coworking as centered in labor issues. More specifically its chapters consider it as a coping mechanism in the worldwide rise of independent modes of work i.e. self employment that leaves more and more workers exposed to precarity as they must organize and manage their own labor. Grounded in this perspective this volume aims to understand the transformative social and political potentials emerging through coworking as a social and spatial practice. There is a distinct lack of discussion within coworking research on the emancipatory potentials of coworking and if it is discussed more cautionary views prevail highlighting the ambivalence of coworking spaces both as a space of alternative economic practices and as integrated into market economies. The aims of this collection are twofold. First it aims to make visible the plurality of existing practices around shared resources in coworking and the assemblages of human and non human actors as agents of change associated with coworking and the re organization of work and labor power. And second it aims to develop a more emancipatory narrative for coworking and the role of coworking spaces for workers but also the different spatial contexts in which these spaces are situated. A narrative that does not emphasize entrepreneurship or coworking as the epitome of the neoliberal entrepreneurial self as in the dominant interpretations in the current research but rather one that centers coworking in the creation of meaningful careful social relationships supporting empathy and an ethics that recognizes mutual interdependencies and builds a foundation for social change. So it is about alternative narratives emancipation politics and the wider social role that coworking spaces might play in neighborhoods cities or beyond because they are crucial contexts for the formation and maintenance of social relations. With this specific direction this collection aims to bring coworking research into a fruitful dialog with other research fields such as sociology of work feminist perspectives on care alternative and diverse economies post capitalist transformation critical geography positioning coworking within a range of progressive alternatives in the articulation of economic and social relationships.

The Future of Work Inka Knappertsbusch, Gerlind Wisskirchen, 2024-12-01 This book takes readers on a journey into the future of work. Following the influence of the COVID 19 pandemic working conditions have become more flexible than ever before. The freedoms granted within this framework continue to be demanded by many employees. There are also numerous companies that have had predominantly positive experiences with this change and would like to continue with it. Against this backdrop it is to be expected that the shift away from a traditional working environment due to the four influencing factors of demographic change skills shortages digitalisation and artificial intelligence will accelerate in the future. This book provides an overview of the various design options for New Work and highlights their respective advantages and disadvantages. It also analyses new trends and forecasts relating to the future of work. In addition the relevant legal framework is presented in a concise and easy to understand manner. This book provides you with the tools you need to actively shape the future of work in your company in a

legally compliant manner The editors Dr Inka Knappertsbusch is a lawyer specializing in employment law and employee data protection at the international commercial law firm CMS Germany She advises companies primarily on restructuring and works agreements in particular on issues related to IT and new work Her work also focuses on data protection and artificial intelligence in employment relationships She is the co editor of the book *Arbeitswelt und KI 2030* Dr Gerlind Wisskirchen is a partner and lawyer at the international commercial law firm CMS Germany and advises multinational corporations in particular on restructuring national and international employment law and compliance issues She is also an expert on the digitalisation of the world of work with experience as a keynote speaker author and lecturer and is the editor of the report *Artificial Intelligence and Robotics and Their Impact on the Workplace* for the Global Employment Institute The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Fundamentals of Software Startups Anh Nguyen-Duc, Jürgen Münch, Rafael Prikladnicki, Xiaofeng Wang, Pekka Abrahamsson, 2020-02-28 This book discusses important topics for engineering and managing software startups such as how technical and business aspects are related which complications may arise and how they can be dealt with It also addresses the use of scientific engineering and managerial approaches to successfully develop software products in startup companies The book covers a wide range of software startup phenomena and includes the knowledge skills and capabilities required for startup product development team capacity and team roles technical debt minimal viable products startup metrics common pitfalls and patterns observed as well as lessons learned from startups in Finland Norway Brazil Russia and USA All results are based on empirical findings and the claims are backed by evidence and concrete observations measurements and experiments from qualitative and quantitative research as is common in empirical software engineering The book helps entrepreneurs and practitioners to become aware of various phenomena challenges and practices that occur in real world startups and provides insights based on sound research methodologies presented in a simple and easy to read manner It also allows students in business and engineering programs to learn about the important engineering concepts and technical building blocks of a software startup It is also suitable for researchers at different levels in areas such as software and systems engineering or information systems who are studying advanced topics related to software business
