

SOCIAL DARWINISM

Social Darwinism suggests that societal advancement is driven by "survival of the fittest." It proposes that the most socially adept or powerful individuals or groups tend to succeed.

OVERVIEW

Social Darwinism applies Charles Darwin's Theory of natural selection to human societies. Walther (2023) proposes that "...for the good of the species, nature should be allowed to weed out the weak. In other words: the struggle for resources should be maximized as a way of getting rid of the weaker members of society, which allows the naturally strong to thrive" (p. 2).

EXAMPLE

- **Capitalist competition:** The good businesses succeed and the bad ones fail.
- **Imperialism:** The strong and superior nations conquer the weak ones.
- **Eugenics:** The belief that a society should filter-out weak genes and encourage the reproduction of strong genes.
