Social Demography:

Social Demography Karl E. Taeuber, Larry L. Bumpass, James A. Sweet, 2013-10-22 Social Demography focuses on selected topics on social science research on population. The papers included in the book are compiled from a conference sponsored by the Center for Population Research held at the University of Wisconsin Madison in June 1975. The book compiles various findings in social and behavioral research. Chapters explore topics on trend analysis, the sociological meaning of age and the social psychological processes of reproductive behavior, analysis of certain aspects of the spatial organization of metropolitan activities, the changing racial stratification and the future of research in social demography. Demographers, sociologists and political and economic policy makers will find the book as a good source of insights.

Population Paul E. Zopf, 1984 **Advances in Social Demography** Robert Schoen, 2025-07-25 This book offers an overview of the latest developments in contemporary population issues by examining the current unprecedented changes in fertility, family behavior, mortality and migration. It explores new theoretical perspectives that seek to incorporate narratives of the future demographic uncertainty and determinants of unplanned pregnancy. The context of fertility is changing and the new important subjects of policy interventions, multi-partner fertility and complex parenthood are explored. Recent developments in assortative mating, partner choice and relationship stability are examined in both national and international contexts while further chapters analyze contemporary international migration. Methodological advances in modeling heterogeneity in mortality and extending period-cohort translation relationships are presented and new analyses explore the implications of age patterns of fertility change. As such, this book provides up-to-date research spanning the entire field to illuminate contemporary developments and will be of value to demographers, sociologists, economists and all those interested in understanding demographic change.
