**Societal Dynamics** Frederick Betz,2014-01-25 At both a micro information level and a macro societal level the concepts of knowledge and wisdom are

complementary in both decisions and in social structures and institutions At the decision level knowledge is concerned with how to make a proper choice of means where best is measured as the efficiency toward achieving an end Wisdom is concerned with how to make a proper choice of ends that attain best values At a societal level knowledge is managed through science technology and innovation And while science technology is society s way to create new means with high efficiencies they reveal nothing about values Technology can be used for good or for evil to make the world into a garden or to destroy all life It is societal wisdom which should influence the choice of proper ends ends to make the world a garden How can society make progress in wisdom as well as knowledge Historically the disciplines of the physical sciences and biology have provided scientific foundations for societal knowledge But the social science disciplines of sociology economics political science have not provided a similar scientific foundation for societal wisdom To redress this gap Frederick Betz examines several cases in recent history that display a fundamental paradox between scientific technological achievement with devastating social effects i e historical events of ideological dictatorships in Russia Germany China and Yugoslavia He builds a new framework for applying social science perspectives to explain societal histories and social theory Emerging from this methodological and empirical investigation is a general topological theory of societal dynamics This theory and methodology can be used to integrate history and social science toward establishing grounded principles of societal wisdom *Society and Knowledge* V.
