The Pabenger:

The Passenger Has Gone Digital and Mobile Nawal K. Taneja, 2016-02-24 Technology is changing expectations in the airline industry. Passengers want to be in control and they expect airlines to become solution providers and aggregators of value to provide them with personalized services. Airline employees expect to be given the tools to do their jobs and to meet passenger expectations. Airline executives expect to make returns that are reasonable and relatively stable through business cycles. All of these expectations can be met by airlines through the effective and efficient leveraging of information and technology to shift from being operations and product centric to becoming customer centric and dramatically improving the overall passenger travel experience throughout the travel cycle. In this new book by world renowned airline expert Nawal K. Taneja, the 7th in a series with Ashgate, the author explores and explains the game changing opportunities presented to the industry by new generation information and technology. He shows how information and technology can now drive not just enable an airline's strategy to become truly customer centric at a personalized level while at the same time enabling the operator to reduce costs, enhance revenues, reduce risks and become much more flexible and agile by better managing complexity.

Fasten Your Seatbelt: The Passenger is Flying the Plane Nawal K. Taneja, 2018-01-09 *Fasten Your Seatbelt: The Passenger is Flying the Plane* is the fourth in a series written at the encouragement of practitioners in the global airline industry. Core customers are beginning to seize control of the direction of the industry from airline management. Customers are doing so due to deep dissatisfaction with what is being offered by traditional carriers across all areas including network, product, price, customer service and the distribution system. New airlines have clearly focused business designs with the discipline to reject non-valued products or services. In the US, new airlines score higher in customer satisfaction, offering lower fares and making larger operating profits. This book is about customer behaviour and how to address it. It provides a detailed but easy to read practical discussion of the changes required on the part of airline management, not only to think boldly but also to execute courageously and relentlessly ground breaking strategies to fly ahead of their customers. As with previous books written by Nawal Taneja, the primary audience continues to be senior level practitioners within the global airline industry in both traditional carrier and low complexity carrier segments. The approach is impartial, candid and pragmatic based on what is happening in the actual market place rather than theoretical business models.
