Reelin-Related Neurological Disorders and Animal Models Laura Lossi, Adalberto Merighi, Gabriella

D'Arcangelo, 2017-03-14 The Reeler mutation was so named because of the alterations in gait that characterize homozygous mice. Several decades after the description of the Reeler phenotype, the mutated protein was discovered and named Reelin. Reelin controls a number of fundamental steps in embryonic and postnatal brain development. A prominent embryonic function is the control of radial neuronal migration. As a consequence, homozygous Reeler mutants show disrupted cell layering in cortical brain structures. Reelin also promotes postnatal neuronal maturation. Heterozygous mutants exhibit defects in dendrite extension and synapse formation, correlating with behavioral and cognitive deficits that are detectable at adult ages. The Reelin encoding gene is highly conserved between mice and humans. In humans, homozygous RELN mutations cause lissencephaly with cerebellar hypoplasia, a severe neuronal migration disorder that is reminiscent of the Reeler phenotype. In addition, RELN deficiency or dysfunction is also correlated with psychiatric and cognitive disorders such as schizophrenia, bipolar disorder, and autism, as well as some forms of epilepsy and Alzheimer's disease. Despite the wealth of anatomical studies of the Reeler mouse brain and the molecular dissection of Reelin signaling mechanisms, the consequences of Reelin deficiency on the development and function of the human brain are not yet completely understood. This Research Topic includes reviews that summarize our current knowledge of the molecular aspects of Reelin function, original articles that advance our understanding of its expression and function in different brain regions, and reviews that critically assess the potential role of Reelin in human psychiatric and cognitive disorders.

From earliest recorded history, glory and triumph of Nusantara has depended on sea/ocean maritime. The existence of Indonesia consists of land, sea, ocean, and air, then moulded within the socio-cultural of Indonesian named Nusantara.
