Ethics as an Ascetic Experience - Power, Language and the Ambiguity of the Visible in Michel Foucault Abhilash G Nath,2011-02-17 Essay from the year 2011 in the subject Philosophy Philosophy of the 20th century language English abstract the directions often and repeatedly taken in most of the works that have been undertaken on Foucault are to place him within the general continental philosophy to examine the theoretical and methodological breaks and continuities within his work and between his work and other major figures in the discipline to examine the nature of his work that is to say whether he can be placed part on the thesis the accepted classics of Continental Thought or with the postmodern post structural antithesis to examine the outcome of his work or what impacts his work has had on Western culture The present study rather asks a very simple and straightforward question and that is how did the way Foucault use historical archaeology allowed him as an analyst to change himself from within Or how Foucault s usage of language constantly changed himself from within Or what is there in language if it comes from outside that transforms the reader from within

Innate potentialities require experience to become knowledge Alexander Borodin,2012-08-24 Research Paper undergraduate from the year 2012 in the subject Philosophy Theoretical Realisation Science Logic Language grade 69 University of Essex Department of Philosophy language English abstract Does our notion of knowledge necessitate that it becomes manifest firstly in our thinking and then in our actions or can it on the contrary exist in a latent hidden way within us and still be considered knowledge Given the exceeding ambiguity behind the term knowledge we will need in the first place a clear definition of knowledge that should in turn enable us to bring focus to our investigation on the whole In the course of this work we will take a look at the main arguments Plato and Leibniz put forward in this regard particularly focusing on their varying concept of innate knowledge and its relation to experience and our capacity to reason In what will follow I shall argue that even if we are able to identify certain instances of pre existing knowledge or understanding it will anyway remain inextricably connected to the experiences we make in our environment Thereby there must be a coincidence of innate capacities and certain outer circumstances for knowledge to emerge and become visible Otherwise the presence of knowledge isn t at any rate recognizable in the real world but exists in an inactivated hidden mode without the respective person even becoming conscious of its existence
