## Urnammu Stela:

**The "Ur-Nammu" Stela** Jeanny Vorys Canby, 2006 Ur Nammu was king of Ur in ancient Mesopotamia southern Iraq around 2000 B C In 1925 a joint expedition from the University of Pennsylvania Museum and the British Museum discovered dozens of fragments of a monument in honor of Ur Nammu Because such works have rarely survived the stela became one of the most famous examples of Near Eastern art a status it retains today The stela had been ten feet high with registers in relief of scenes of religious practices on both front and back By 1927 the best pieces had been restored in Philadelphia into an imagined version of the stela with plaster filling the gaps But more than twice as many small or worn pieces were omitted from the restoration and dutifully stored in boxes at the Museum Jeanny Vorys Canby realized that the early reconstruction had been too hasty and her meticulous painstaking reexamination reveals a wealth of new scenes that revise our understanding of the monument This book includes the justification of the reconstructions description of the scenes speculation on the ancient fate of the stela as well as a description of each piece with photograph and drawing These vigorous innovative scenes contradict the long held view from the old reconstruction that the monument was dull and repetitive In fact it is fresh and vibrant with dynamic scenes peopled by beautifully sculpted actors Entirely new evidence is presented here in scientific detail including appendices from Steven Tinney of the Museum's Babylonian Section and Tamsen Fuller conservator The book's conclusions will be of major significance to historians archaeologists art historians biblical scholars and anthropologists working in the ancient Near East and to scholars concerned with institutions of kinship religion and everyday life University Museum Monograph 110 The World's Oldest Literature William W.
