Designing Tall Buildings Mark Sarkisian, 2012-03-22 The first of its kind Designing Tall Buildings is an accessible reference that guides you through the fundamental principles of designing high rises Each chapter focuses on one theme central to tall building design giving you a comprehensive overview of the related architecture and structural engineering concepts Mark P Sarkisian provides clear definitions of technical terms and introduces important equations to help you gradually develop your knowledge Later chapters allow you to explore more complex applications such as biomimicry Projects drawn from Skidmore Owings and Merrill s vast catalog of built high rises many of which Sarkisian designed demonstrate these concepts This book advises you to consider the influence of a particular site s geology wind conditions and seismicity Using this contextual knowledge and analysis you can determine what types of structural solutions are best suited for a tower on that site You can then conceptualize and devise efficient structural systems that are not only safe but also constructible and economical Sarkisian also addresses the influence of nature in design urging you to integrate structure and architecture for buildings of superior performance sustainability and aesthetic excellence

Building Design for Wind Forces: A Guide to ASCE 7-16 Standards Rima Taher, 2018-08-24 Expert coverage of ASCE 7 16 compliant wind resistant engineering methods for safer sounder low rise and standard multi story buildings Using the hands on information

contained in this comprehensive engineering guide you will be able to design and construct safer buildings that will better withstand extreme wind forces Written by a recognized structural design expert the book explains the general concepts and principles involved in the design of buildings and structures for wind forces Structural systems used to resist wind forces are outlined and explained in the context of both low rise and high rise buildings Building Design for Wind Forces provides easy to follow summaries of complex ASCE 7 16 wind load provisions and shows how to apply the corresponding design procedures using practical examples A detailed discussion of typical structural damage caused by extreme wind events such as hurricanes and tornadoes is presented along with design recommendations Current wind engineering activities and recent research developments are discussed and a general overview of wind tunnel procedures and an introduction to the concept of database assisted design DAD is provided Building Design for Wind Forces covers Wind forces and wind effects on buildings and structures Wind load provisions of the ASCE 7 16 standard Damage to structures caused by extreme wind events Wind engineering activities and research trends Structural systems for lateral loads Tall buildings Wind design procedures and wind load parameters Wind loads on the Main Wind Force Resisting System MWFRS Wind loads on Components and Cladding C C Wind loads on building appurtenances and other structures Wind tunnels and the wind tunnel procedure Database assisted design DAD

Technical Code for Monitoring of Building Structures Yang Yang,2019-11-30 This book is used as a reference book for researcher and engineer of the world to learn the building monitoring standard of China for the first time and is also be used as a reference manual for engineer to engage in practical monitoring projects The standard for project construction of Technical Code for Monitoring of Building Structures in Qinghai Province is the first standard for building structure monitoring engineering in China which integrates design construction and acceptance of monitoring technique It can be applied to any place in the world not limited to Qinghai The standard specifies the warning thresholds for various building structure monitoring parameters In the monitoring technology advanced monitoring technologies such as structure group cloud platform and BIM are adopted It has strong operability for monitoring building structures according to the requirement of the standard provides technical support for ensuring the safety of building structure and fills in the blank of building structure safety monitoring technology in high and cold high altitude areas It contains specific measures to implement housing security for the first time which is one of the two without worries and three guarantees proposed by General Secretary Xi Jinping It is also used as a reference book for senior undergraduate and graduate students in colleges and universities

Tall Buildings: From Engineering To Sustainability Y K Cheung,Kwong Wing Chau,2005-12-06 A collection of papers presented at the Sixth International Conference on Tall Buildings ICTB this volume clearly explains the engineering and socio economic aspects of tall buildings in specific areas of sustainability The papers focus on Asian cities where tall buildings have become a major feature of the built environment A multi disciplinary book it also deals with the increasing complexity of inter related problems that require knowledge integration from different disciplines With interesting
