Routledge Handbook of Descriptive Rhetorical Studies and World Languages Weixiao Wei, James Schnell, 2023-05-12 The Routledge Handbook of Descriptive Rhetorical Studies and World Languages offers a useful collection of papers that presents rhetorical analysis of the discursive practice in different cultural settings. Covering issues from America to Europe and Asia and topics from politics to media education to science agriculture to literature and so on, the handbook describes how language can guide listeners' interpretations, alter their perceptions, and shape their worldviews. This book offers a solid foundation for rhetorical studies to become an essential discipline in arts and humanities, engendering innovative theory and applications in areas such as linguistics, literature, history, cultural studies, political science, and sociology. This handbook will be crucial for students and researchers in areas such as literature and linguistics, communication studies, political science, and arts and humanities in general. This book will also be useful to social science, education, business, law, science, and engineering departments due to its coverage of rhetoric in a multidisciplinary and multilingual context. Chapter 16 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com. It has been made available under a Creative Commons Attribution Non-Commercial No Derivatives 4.0 license.

Learning to Teach Modern Foreign Languages in the Secondary School Norbert Pachler, Kit Field, 1997 Designed as a text to support student teachers in training, this book focuses on the key skills of teaching modern foreign languages. The practical focus of the book is underpinned by a theoretical perspective including ample opportunities for reflection. Account is taken of national statutory frameworks. The book aims to assist student teachers in developing a personal approach to modern foreign languages teaching and to choose the most effective and appropriate methods to help pupils gain relevant knowledge, skills, and understanding. For mentors and tutors working with student teachers, this book provides an overview of the areas covered by student teachers during their course of initial teacher education. Chapters cover, for instance, the teaching of grammar and cultural awareness, assessment, the use of the target language for instruction and interaction, the use of new technologies in the classroom. Examples are given in French, German, and Spanish, but most are transferable to other languages.

Language and Migration Vol III Ingrid Piller, 2026-02-02 Language and Migration is timely for two main reasons: one is that social international migration is at an all-time high, and the other is that theoretical theorizing about language as a mobile resource is currently the most exciting frontier in sociolinguistics. Including the very best contemporary scholarship as well as key foundational research, this four-volume collection will strike a balance between the socially relevant and topical issues of wider concern raised by migration on the one hand and disciplinary, conceptual, and methodological concerns on the other. In doing so, Language and Migration is intended both as a showcase of the most important work in the field as well as an intervention into contemporary debates.

Loanwords in the World's Languages Martin Haspelmath, Uri Tadmor, 2009-12-22 This book is the first work to address the question of what kinds of words get borrowed in a systematic and comparative perspective It studies lexical borrowing behavior on the basis of a world wide sample of 40 languages both major languages and minor languages and both languages with heavy borrowing and languages with little lexical influence from other languages The book is the result of a five year project bringing together a unique group of specialists of many different languages and areas The introductory chapters provide a general up to date introduction to language contact at the word level as well as a presentation of the project s methodology All the chapters are based on samples of 1000 2000 words elicited by a uniform meaning list of 1460 meanings The combined database comprising over 70 000 words is published online at the same time as the book is published For each word information about loanword status is given in the database and the 40 case studies in the book describe the social and historical contact situations in detail The final chapter draws general conclusions about what kinds of words tend to get borrowed what kinds of word meanings are particularly resistant to borrowing and what kinds of social contact situations lead to what kinds of borrowing situations
