Omeri Xiao Long Xin **Neutrosophic Sets and Systems, Vol. 35, 2020** Florentin Smarandache, Mohamed Abdel-Basset,
Neutrosophic Sets and Systems has been created for publications on advanced studies in neutrosophy neutrosophic set
neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field
such as the neutrosophic structures developed in algebra geometry topology etc Some articles in this issue Neutrosophic Soft
Fixed Points Selection of Alternative under the Framework of Single Valued Neutrosophic Sets Application of Single Valued
Trapezoidal Neutrosophic Numbers in Transportation Problem **Bipolar fuzzy hypersoft set and its application in
decision making** Ashraf Al-Quran, Faisal Al-Sharqi, Kifayat Ullah, Mamika Ujianita Romdhini, Marwa Balti, Mohammed
Alomair, 2023-01-01 Smarandache developed the idea of hypersoft set HSS theory as an extension of soft set SS theory HSS
provides a general mathematical framework for handling data that can be formulated as several trait valued disjoint sets
which blend to various traits The major goal of this article is to lay the footing for supplying a new model called bipolar fuzzy
hypersoft sets BFHSSs by linking both fuzzy sets FSs and HSSs under bipolarity property By using positive and negative
membership functions and multi argument functions these structures work best for testing uncertainty This makes them
better at solving real world problems especially ones that have both good and bad sides This paper also has different
operations for BFHSSs such as absolute BFHSS null BFHSS complement subset union intersection and their related
properties Moreover operations like OR and AND for BFHSS have been instituted Some properties are demonstrated and
some numerical examples are given to illustrate the mechanism of using these tools Finally these tools are applied in the
decision making process based on an algorithm that is built *An Application of Neutrosophic Sets to Decision Making*
Michael Gr. Voskoglou, 2023-01-01 Frequently in real life situations decision making takes place under fuzzy conditions
because the corresponding goals and or the existing constraints are not clearly defined Maji et al introduced in 2002 a
method of parametric decision making using soft sets as tools and representing their tabular form as a binary matrix As we
explain here however in cases where some or all of the parameters used for the characterization of the elements of the
universal set are of fuzzy texture their method does not give always the best decision making solution In order to tackle this
problem we modified in earlier works the method of Maji et al by replacing the binary elements in the tabular form of the
corresponding soft set either by grey numbers or by triangular fuzzy numbers In this work in order to tackle more efficiently

cases in which the decision maker has doubts even about the correctness of the fuzzy qualitative characterizations assigned to some or all of the elements of the universal set we replace the binary elements of the tabular form by neutrosophic triplets Our new neutrosophic decision making method is illustrated by an application concerning the choice of a new player by a soccer club

Neutrosophic Soft Rough Topology and its Applications to Multi-Criteria Decision-Making Muhammad Riaz ,Florentin Smarandache,Faruk Karaaslan,Masooma Raza Hashmi,Iqra Nawaz, In this manuscript we introduce the notion of neutrosophic soft rough topology NSR topology defined on neutrosophic soft rough set NSR set We define certain properties of NSR topology including NSR interior NSR closure NSR exterior NSR neighborhood NSR limit point and NSR bases Furthermore we aim to develop some multi criteria decision making MCDM methods based on NSR set and NSR topology to deal with ambiguities in the real world problems For this purpose we establish algorithm 1 for suitable brand selection and algorithm 2 to determinencore issues to control crime rate based on NSR lower approximations NSR upper approximations matrices core and NSR topology

Simulated Evolution and Learning Grant Dick,Will N. Browne,Peter Whigham,Mengjie Zhang,Lam Thu Bui,Hisao Ishibuchi,Yaochu Jin,Xiaodong Li,Yuhui Shi,Pramod Singh,Kay Chen Tan,Ke Tang,2014-11-11 This volume constitutes the proceedings of the 10th International Conference on Simulated Evolution and Learning SEAL 2012 held in Dunedin New Zealand in December 2014 The 42 full papers and 29 short papers presented were carefully reviewed and selected from 109 submissions The papers are organized in topical sections on evolutionary optimization evolutionary multi objective optimization evolutionary machine learning theoretical developments evolutionary feature reduction evolutionary scheduling and combinatorial optimization real world applications and evolutionary image analysis

An Approach toward a Q-Neutrosophic Soft Set and Its Application in Decision Making Majdoleen Abu Qamar,Nasruddin Hassan, A neutrosophic set was proposed as an approach to study neutral uncertain information It is characterized through three memberships T I and F such that these independent functions stand for the truth indeterminate and false membership degrees of an object The neutrosophic set presents a symmetric form since truth enrolment T is symmetric to its opposite false enrolment F with respect to indeterminacy enrolment I that acts as an axis of symmetry

Arruda,2019-11-07 This book examines the nature of the energy curriculum in Arctic Higher Education and provides invaluable data and new models to assess levels of Sustainable Development Literacy Drawing on course mapping conducted in Higher Education institutions across the Arctic Arruda looks at the nature structure and design of the Arctic Higher Education curriculum in order to assess levels of Sustainable Development Literacy and considers the extent to which Arctic Higher Education courses align to UNESCO Education for Sustainable Development ESD Using data from four key case studies in Norway Canada and the US and applying a framework drawn from different knowledge systems Traditional Knowledge and Western educational system she analyses the different educational approaches and pedagogies used and specifically considers how Higher Education in this

region can contribute to the accomplishment of Sustainable Development and the Sustainable Development Goals The book concludes by proposing new models to assess Higher Education adherence to ESD and outlines how a culturally inclusive curriculum can invite different groups of people to engage in a meaningful Sustainable Development debate learning experience and knowledge application This innovative volume will be of great interest to multicultural students scholars and educators of Sustainable Development climate change energy Arctic studies and global Higher Education across the Arctic and non Arctic nations
