Political Worship Bernd Wannewetsch, 2009-06-18 How does Christian ethics begin This pioneering study explores the grammar of the Christian life as it is embodied and learned in worship as the formative experience of the fellow citizens of God's people The book presents the first in depth theological investigation of the phenomenon of political worship by exposing the political nature of worship and the worship dimension of politics In a careful analysis of biblical and traditional conceptions of worship Wannewetsch demonstrates how the genuine political character of worship neutralizes attempts to politicize or de politicize it In the imprinting of the experience of divine reconciliation on the Christian body worship challenges the deepest antagonisms of political theory and practice antagonisms of private and public freedom and necessity and action and contemplation At the same time the spill over of worship into every sphere of life instils a healthy suspicion of post liberal conceptualizations of role mobility In the experience of hearing in communion an encounter with a word that does not deceive announces the end of the rule of the hermeneutics of suspicion Further questions discussed include the conditions of true consensus forgiveness as a political virtue political rhetoric between accountability and self justification how reversible role taking can avoid losing the otherness of the other and how the rhetoric of responsibility can be saved from hubris or depression Particular practices or dimensions of worship confession preaching praising intercession observance of holy days are examined and their heuristic and formative potentials explored in relation to these topics A special feature of the study is a strong ecumenical and international focus The book brings into conversation a variety of traditions including Lutheran Catholic Anglican and Orthodox and contemporary voices An original contribution to Christian ethics the book addresses systematic and practical theology as well as political theory while indicating the essential interpenetration of these disciplines

**Worship and Ethics** Max Kadushin, 2001 Worship and Ethics Max Kadushin, 2001 This book claims that cultural phenomena exist in rabbinic Judaism worship and ethics Each individual has his own personal experiences in both spheres but what make the experiences possible are the values of society Theories depicting the individual as the creative rebel who overcomes the bonds of routine and inertia with which the tribe would enslave him certainly do not apply to rabbinic Judaism and in essence probably to no religion Such theories must use terms like worship repentance or love terms and ideas provided by the tribe and by society Worship and ethics are closely associated in rabbinic Judaism The creative agency which developed both spheres is Halakah the rabbinic law and their close association is likewise largely due to Halakah The aim of this book is to describe how Halakah working with the value concepts of the folk as a whole enables the individual to achieve religious experience

**Ethics and Christian Musicking** Nathan Myrick, Mark Porter, 2021-03-22 The relationship between musical activity and ethical significance occupies long traditions of thought and reflection both within Christianity and beyond From concerns regarding music and the passions in early Christian writings through to moral panics regarding rock music in the 20th century Christians have often gravitated to the view that music can become morally weighted building a range of normative practices and prescriptions upon particular modes of ethical judgment But how should we think about ethics and Christian musical activity in the contemporary world As studies of Christian musicking have moved to incorporate the experiences agencies and relationships of congregations ethical questions have become implicit in new ways in a range of recent research how do communities negotiate questions of value in music How are processes of encounter with a variety of different others negotiated through musical activity What responsibilities arise within musical communities This volume seeks to expand this conversation Divided into four sections the book covers the relationship of Christian musicking to the body responsibilities and values identity and encounter and notions of the self The result is a wide ranging perspective on music as an ethical practice particularly as it relates to contemporary religious and spiritual communities This collection is an important milestone at the intersection of ethnomusicology musicology religious studies and theology It will be a vital reference for scholars and practitioners reflecting on the values and practices of worshipping communities in the contemporary world

**Worship and Ethics** Max Kadushin, 1963      **Encyclopaedia of Religion and Ethics: Indexes** James Hastings, John Alexander Selbie, Louis Herbert Gray, 1927      **Music for Others** Nathan Myrick, 2021 Musical activity is one of the most ubiquitous and highly valued forms of social interaction in North America to say nothing of world over being engaged from sporting events to political rallies concerts to churches Moreover music's use as an affective agent for political and religious programs suggests that it has ethical significance Indeed many have said as much It is surprising then that music's ethical significance remains one of the most undertheorized aspects of both moral philosophy and music scholarship Music for Others Care Justice and Relational Ethics in Christian Music fills part of this scholarly gap by focusing on the religious aspects of musical activity particularly on the practices of Christian communities Based on ethnomusicological fieldwork at three Protestant churches and a group of seminary students studying in an immersion course at South by Southwest SXSW and synthesizing theories of discourse formation and care ethics oriented towards restorative justice it first argues that relationships are ontological for both human beings and musical activity It further argues that musical meaning and emotion converge in human bodies such that music participates in personal and communal identity construction in affective ways yet these constructions are not always just Thus considering these aspects of music's ways of being in the world Music for

Others finally argues that music is ethical when it preserves people in and restores people to just relationships with each other and thereby with God     **Worship and Ethics** M.
