Goldlust, 1977? **The role of households in solid waste management in East Africa capital cities** Aisa Oberlin Solomon, 2023-09-04 Household solid waste management is a severe problem in East Africa capital cities Domestic actors tend to be neglected in their role in solving the problem This book develops a new conceptual framework for analyzing the role of households in solid waste management in East Africa s capital cities This conceptual framework is derived from the theory of the Modernized Mixture Approach By focusing on households in informal settlements in particular domestic routines for handling wastes are analyzed for their technical and social dimensions By elaborating upon the technical and social aspects of domestic solid wastes and the role of householders in producing and handling these wastes this book adds to the scanty body of scientific knowledge of sustainable waste management by householders in East African countries The knowledge generated with respect to technical and social dimensions can be used in the future by researchers and policy makers in SWM policies both in East Africa and comparable situations elsewhere in the world *Modern Solid Waste Management in Practice* Anna Bernstad Saraiva Schott, Henrik Aspegren, Mimmi Bissmont, Jes la Cour Jansen, 2013-12-17 This book focuses on sustainable solid waste management in an urban context and gives an example of how a modern city can work with waste management for increased sustainability in close cooperation with the academy The book describes challenges which the city is facing and presents a case on how these can be tackled based on several research and development projects performed in the City of Malm over the last decade In these projects the city has worked as a test bed for new solutions developed with and evaluated by the university The projects and evaluations of the same have been developed with a multi dimensional approach including technical aspects resource efficiency economic parameters information strategies towards households and user friendliness Methods used for evaluation are presented in a comprehensive way together with a discussion on how results from performed evaluations have affected the solid waste management policy making in the city The book describes a bridging over a commonly noticed gap between research on the one hand and policy making and technical management on the other

Several examples are given on how academy and real life and full scale developments in the city can have a fruit full collaboration where feed back from evaluation of made changes are used for continuous improvements at the same time as the actual needs from the city forces the academy to develop new methods for evaluations and develop new solutions to previously un known or un addressed problems
