Japanese Digital Cultural Promotion Nadejda Gadjeva,2023-06-16 Gadjeva uses Kyoto as a case study to explore the innovative mechanisms being used to promote Japanese culture and cultural properties since the outbreak of COVID 19 Beginning by setting out the main initiatives and actors involved in preserving introducing and utilizing Kyoto s cultural heritage Gadjeva proceeds to discuss alternative approaches using digital technologies These tools include remote access virtual reality augmented reality augmented virtuality and mixed reality She looks at how such approaches have been applied to Kyoto s digital museums real time online experiences and other virtual projects presenting tangible intangible and folk heritage In doing so she draws on a wide range of interviews with experts from the Japan Foundation the Kyoto Art Center and other related institutions to investigate the limitations and possible strategies for further development of these practices She also interviews scholars government officials and experts from Europe about the prospects for further remote online experiences applied both specifically to Kyoto and more broadly to cultural tourism Based on the findings the book discusses particular future challenges and suggests specific policies and project proposals for further remote online experiences of Kyoto s cultural properties A valuable read for professionals and scholars of cultural and tourism studies that will be of particular interest to those specializing in Japan

Production Research 1993 V. Orpana,A. Lukka,1993 Research into industrial production is a varied and far reaching activity and cannot be said to be the province of any one particular science Industrial production research is a subject which cannot be covered in any one or even several branches of study expertise in other fields of science is also needed for this research The guiding principle on which industrial production is based is to manufacture marketable quality products using the factors of production as economically as possible Only in this way can profitability be assured and future production be guaranteed Industrial centres have sprung up throughout the world in which the latest technological achievements have been applied with great success The 322 papers in this volume review current issues of production in an increasingly demanding working environment Current problems are analysed which can only be solved through worldwide production research which will also further industrial development The effects of both industrial production and the production of energy on the natural environment are examined in detail The articles presented in this book emphasise the need for flexibility and concentration of forces in production research in order to propose and implement approaches and solutions which can be adapted to continuously changing circumstances It is hoped that the readers of this volume will consider production research as an ongoing and open project which requires multidisciplinary cooperation to cope with the many open questions on future industrial development throughout the world
